

!!Drunk Fortress!!

Years 1 - 12

It's come to my attention that there are a decent amount of people actually up for a Succession of Drunk Fortress. Drunk Fortress is pretty much what it sounds like: Everybody plays a year while taking careful notes and screenshots... Inebriated. The results should be nothing short of awful phenomenal. Due to popular request, the embark site comes furnished with its own personal volcano!

We've been Troped! [**!!DRUNK FORTRESS!! TV Tropes Page**](#)

Rules:

- 1.) *Pregame your year by drinking. Drink until you feel you are unquestionably inebriated.*
- 2.) *Start your post by telling us how much you consumed before starting. Pictures of beverages welcome, but not necessary.*
- 3.) *Try to dorf all of those who wish to be dorfed and haven't been yet.*
- 4.) *Write out your log as you play while taking screenshots. Drink at your leisure. Whenever you finish a drink, let the reader know by writing about it in the post. As you write in the log, don't worry about typos or grammar... You're drunk.*
- 5.) *Finish out your year, save, and upload to DFFD. Total your number of drinks at the bottom of your post, along with a link to the new file save. You may make a drunken statement or quote in the last line for posterity, hilarity, and flavor.*
- 6.) *Drink lots of water and take a nap.*

Kamin's Journal, Entry one

Kicked out for being "too Dwarven?" For drinking "too much alcohol?" Inconceivable! If we can't drink as we please I won't stay here, anyway. By Armok do I need a pint...

Year Start Drink Tally: 6 Beers

[The following are the notes I wrote while playing. Pictures are large, but you can see the whole thing by scrolling over with the directional keys.]

Just a little shy on cash to go with wine tonight, so I went a cheaper, less effective route: Beer. I'm going to make sure

I'm feeling it before I begin the embark prep, so I'm gonna kill four in a relatively short time.

In order to maximize effects, I

didn't eat anything today. It's not something I recommend for anybody--I'm just awesome like that. And also, I want to really

make the most out of our drunken first year 🍷

6:40 PM-First sip, MGD 12 oz., 4.7%; 6:45 PM, finished

6:45 PM-Keystone Ice 12 oz., 5.9%; 6:51 PM, finished

6:52 PM-Keystone Ice 12 oz., 5.9%; 7:03 PM, finished

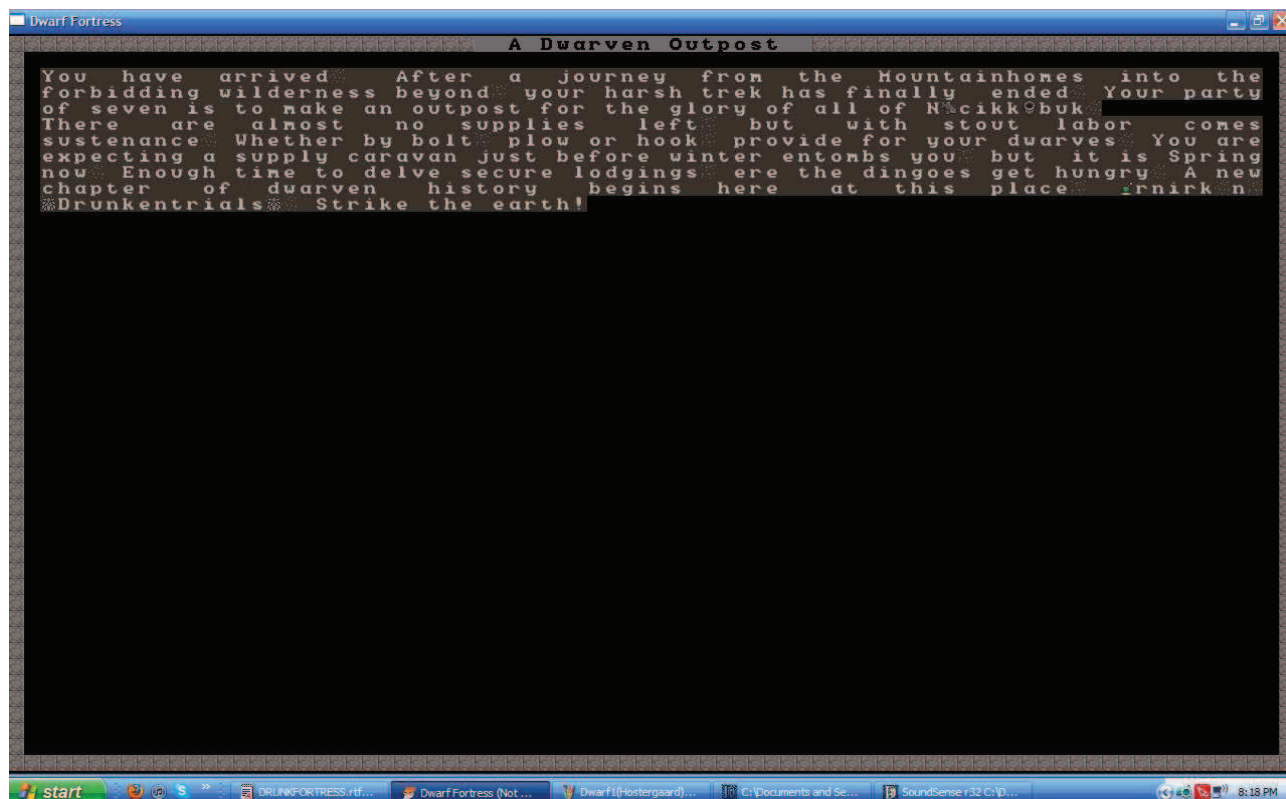

7:04 PM-Keystone Ice 12 oz., 5.9%; 7:08 PM, finished

--working on Embark... Forgot how long it'd take when dorfing people--

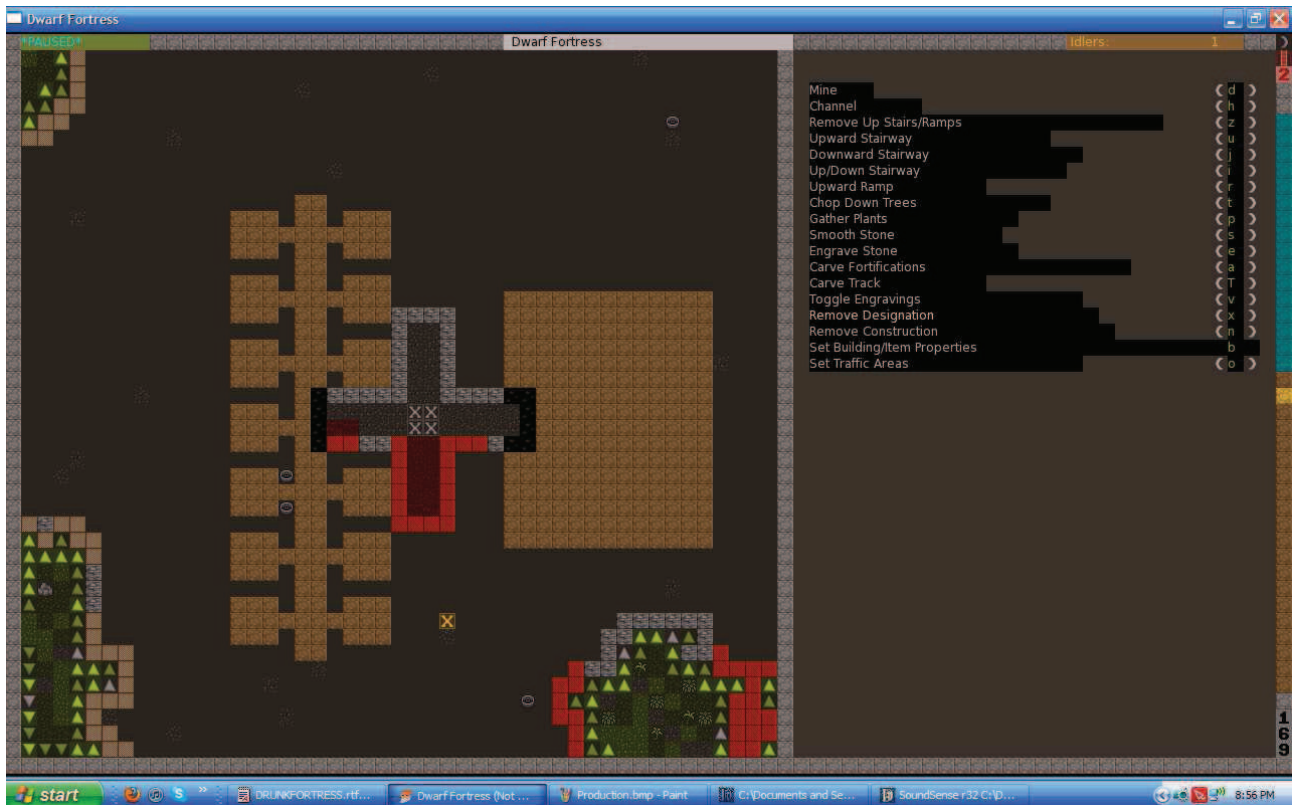

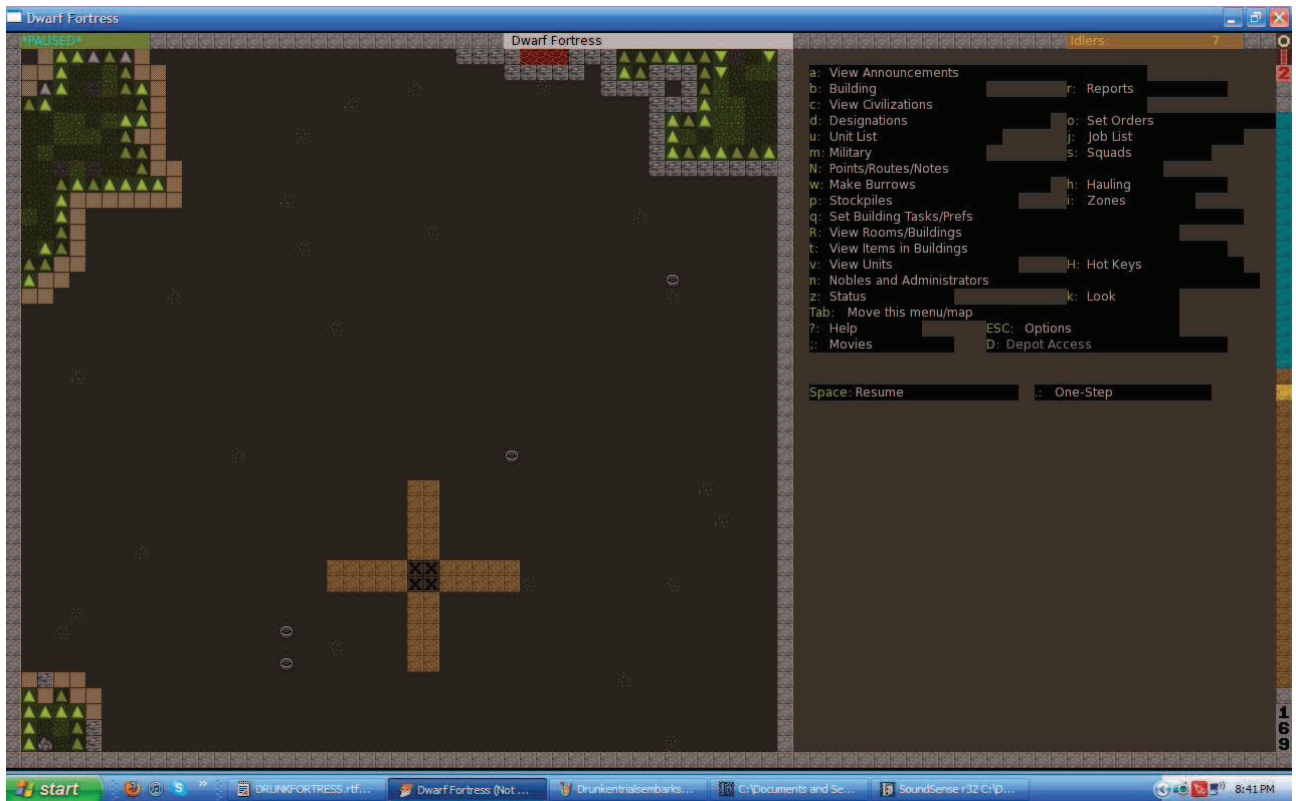

8:00 PM-Keystone Ice 12 oz., 5.9%; 8:10 PM, finished

8:17 PM-Keystone Ice 12 oz., 5.9%; 8:24 PM, finished (on the Embark screen)

So my first orders were setting stockpiles and pastures on the 9th Z level. After that, I ordered for some stairs leading down from there. Arrived 1st of Granite and was drunk the whole time.

Finish MGD.

Holyt shit, I'm pretty drunk right now.

Finish MGD and a Keystone.

The dwarves are working nicely. A hen was also stung by a bumblebee. I will make a tom b worthy of a king! Kamin, Lord of Drunkentrials! One of my successors will surely harness the power of magma, and then we will be unstoppable.

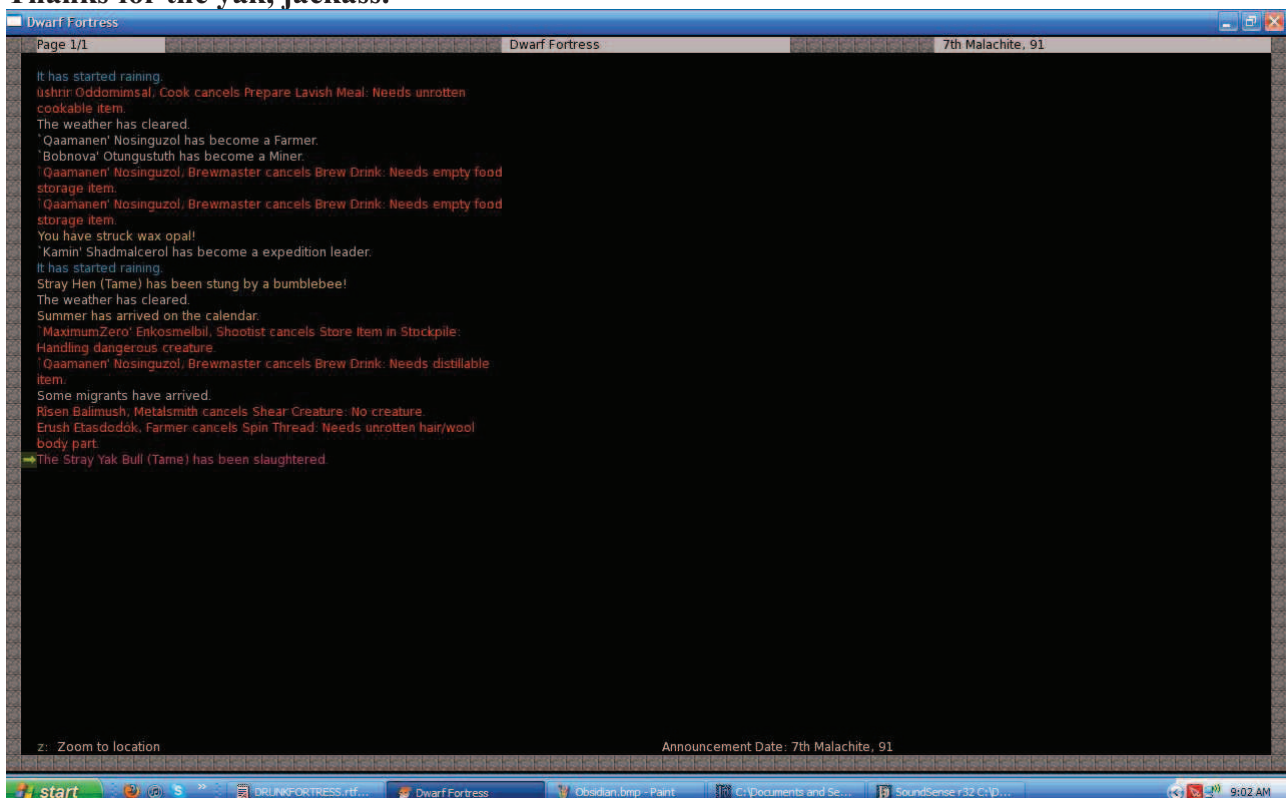

Singed Lances miss us.

Finish Keystone.

Faaaaaack. 4 migrangs, 23rd Hematite, Early Summer. Marksdwarg, Jewelr, Potter, Farmer

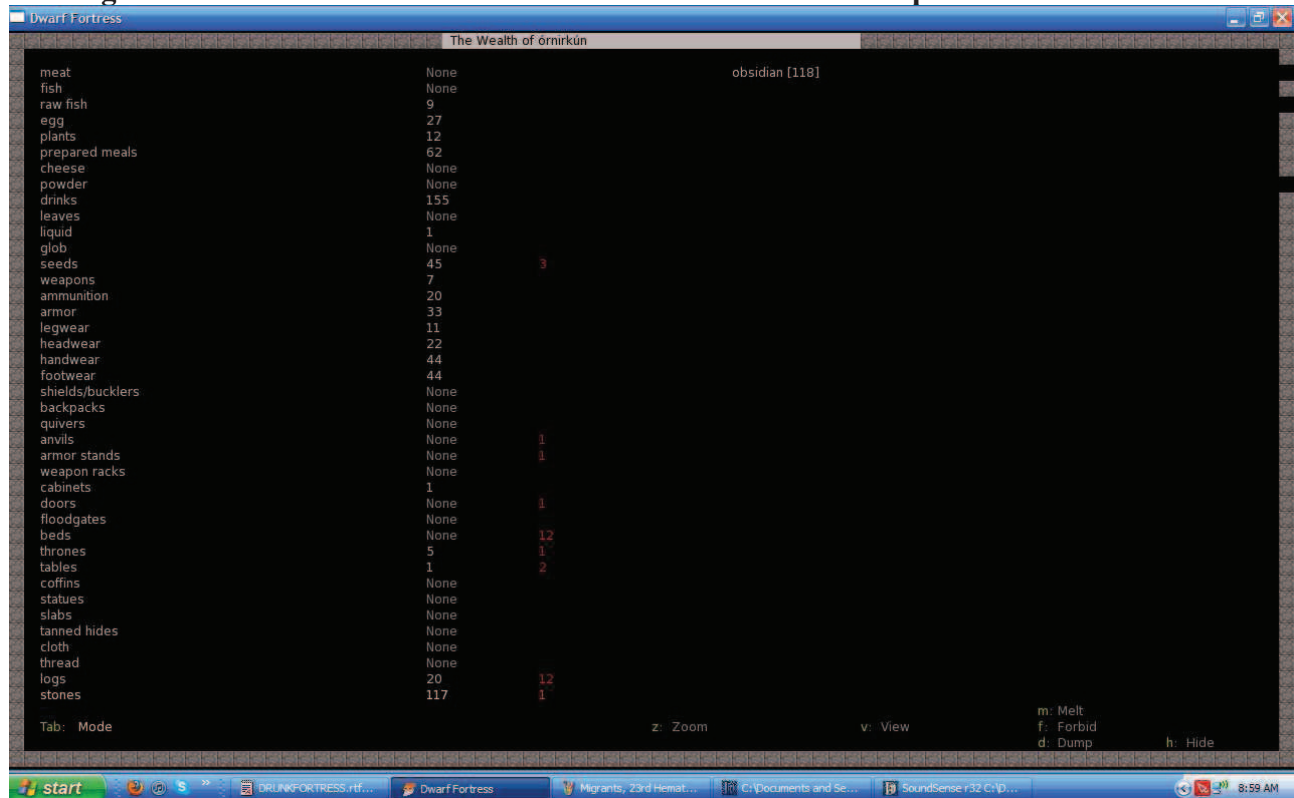

Thanks for the yak, jackass.

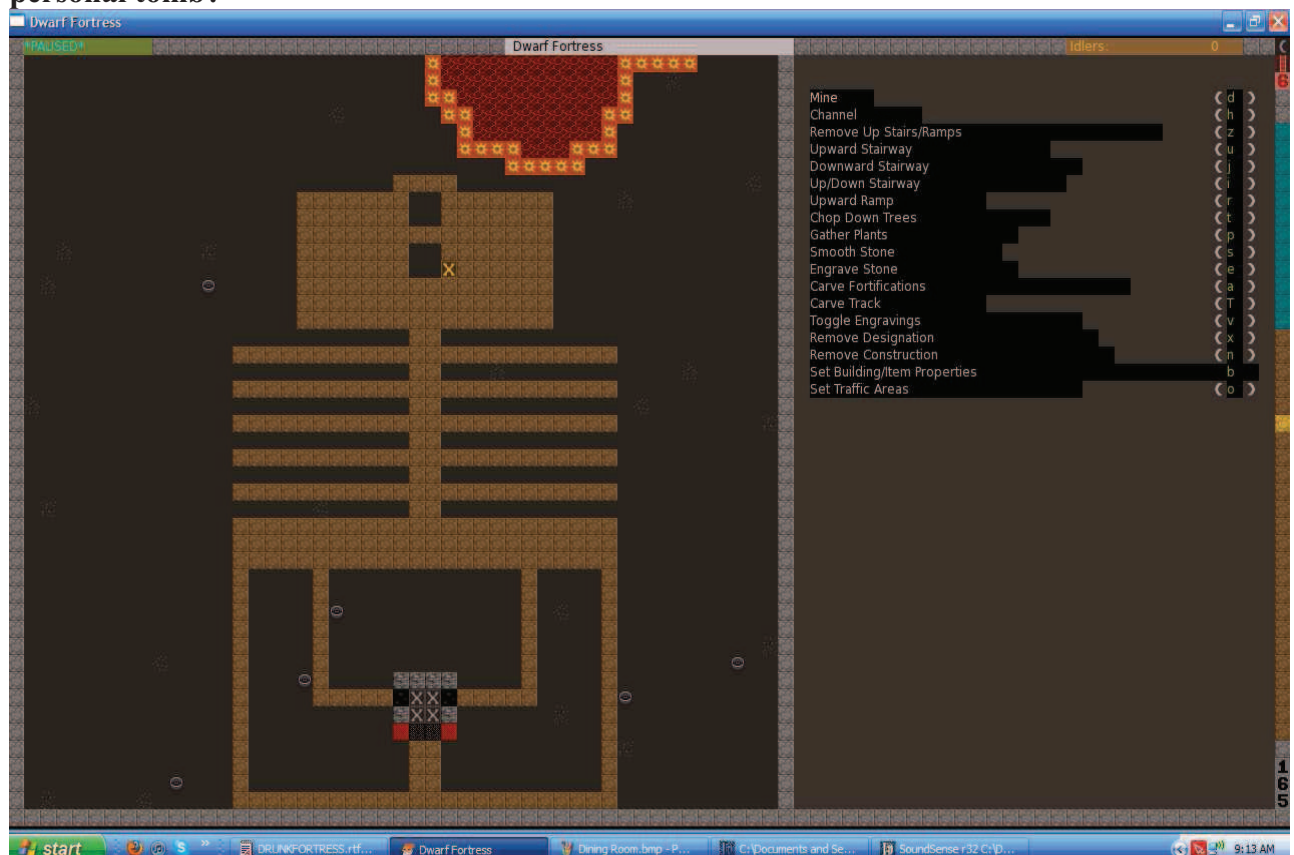

Finish Keystone.

We've got so much obsidian. Time for swords and badass workshops!

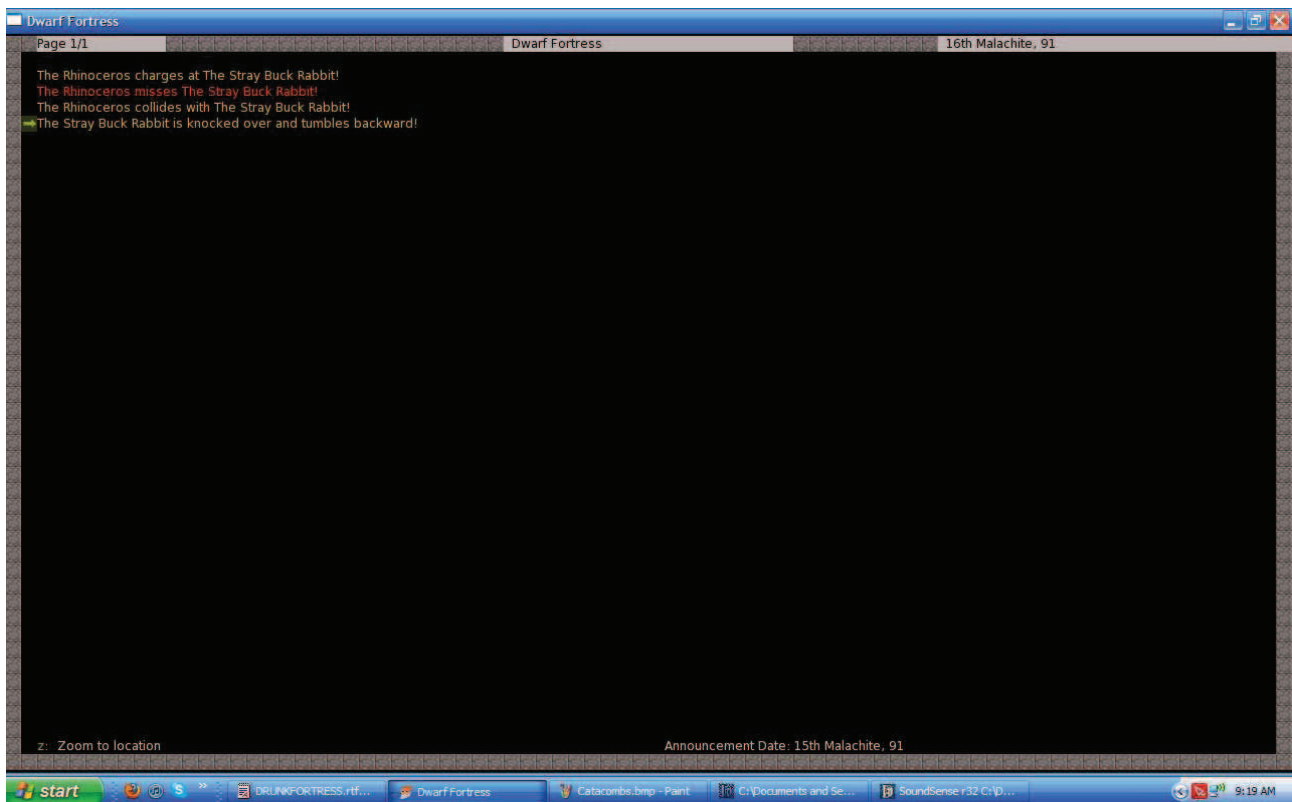

Finish Keystone.

I have designated an area for a catacombs. It will be unlike the cold, dank tombs of our bearded brethren--it is warmed by the bowels of a volcano. Did I mention that this is my personal tomb?

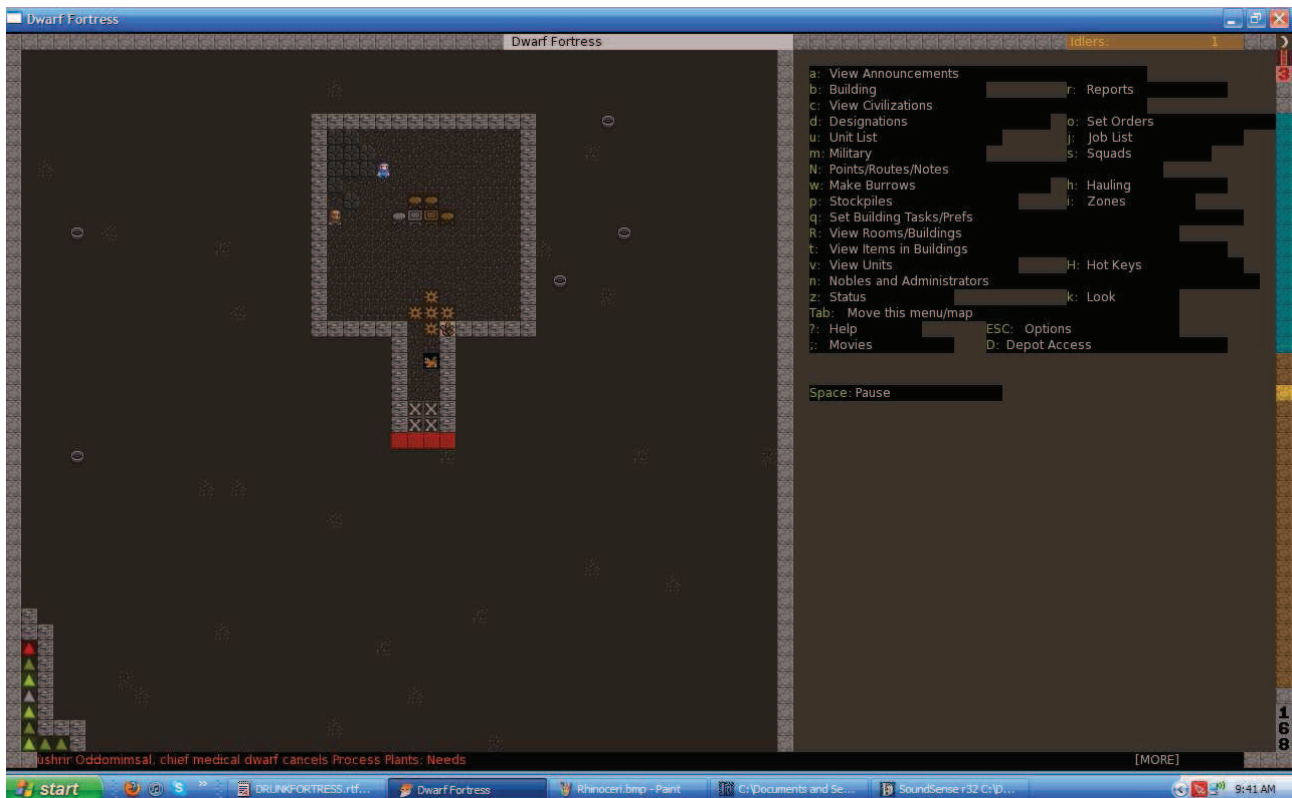

This embark site has rhinoceri. Armok help us.

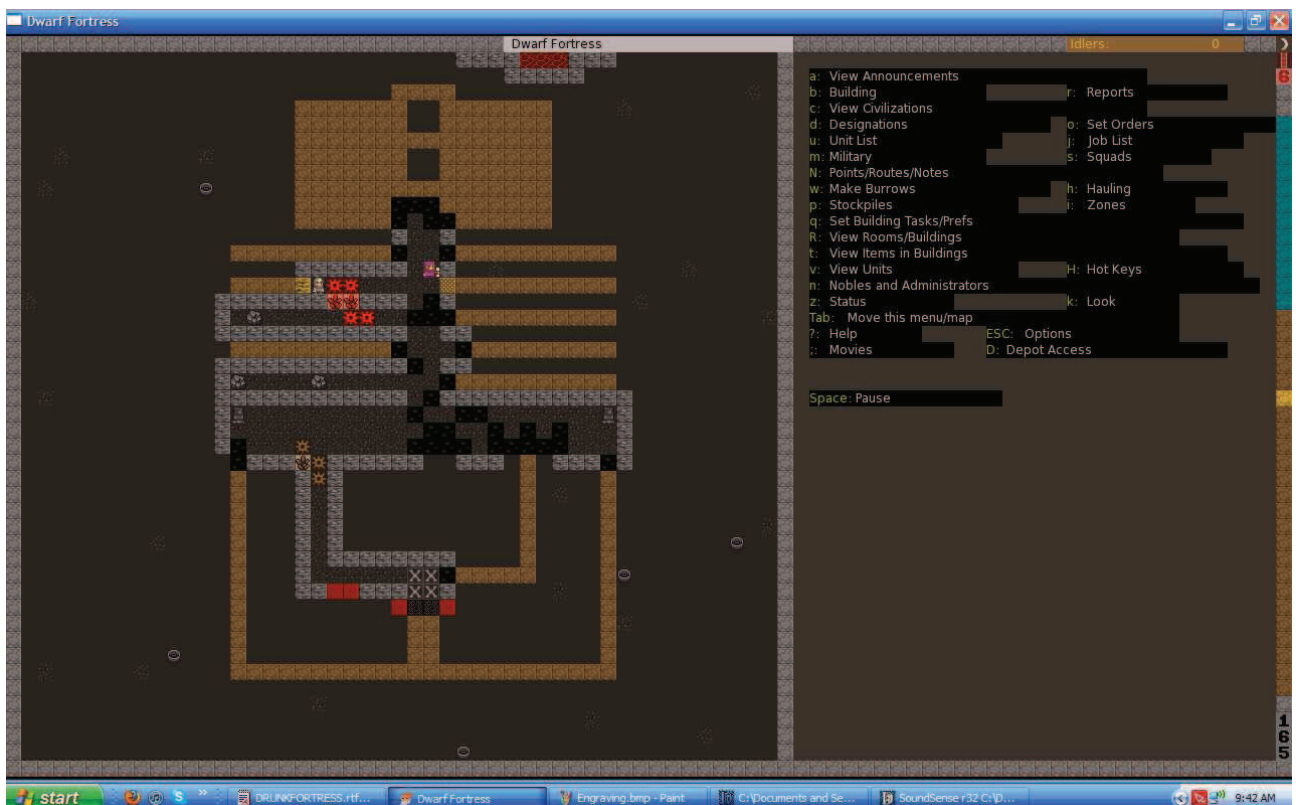

Finish Keystone.

We're starting to smooth the floors of the dining room. It will be great.

My tombchambers are combing along very nicelt.

Finish Keystone.

The rabbits are breeding like... Well, like rabbits. We'll get some leather for quivers and a little extra meat soon. We've got quite a few bumblebees around here... We should make some mead at some point.

The dogs have started giving birth. Lots of birth. I am the dogmaster!

17th Limestone--started engraving floor of dining room.

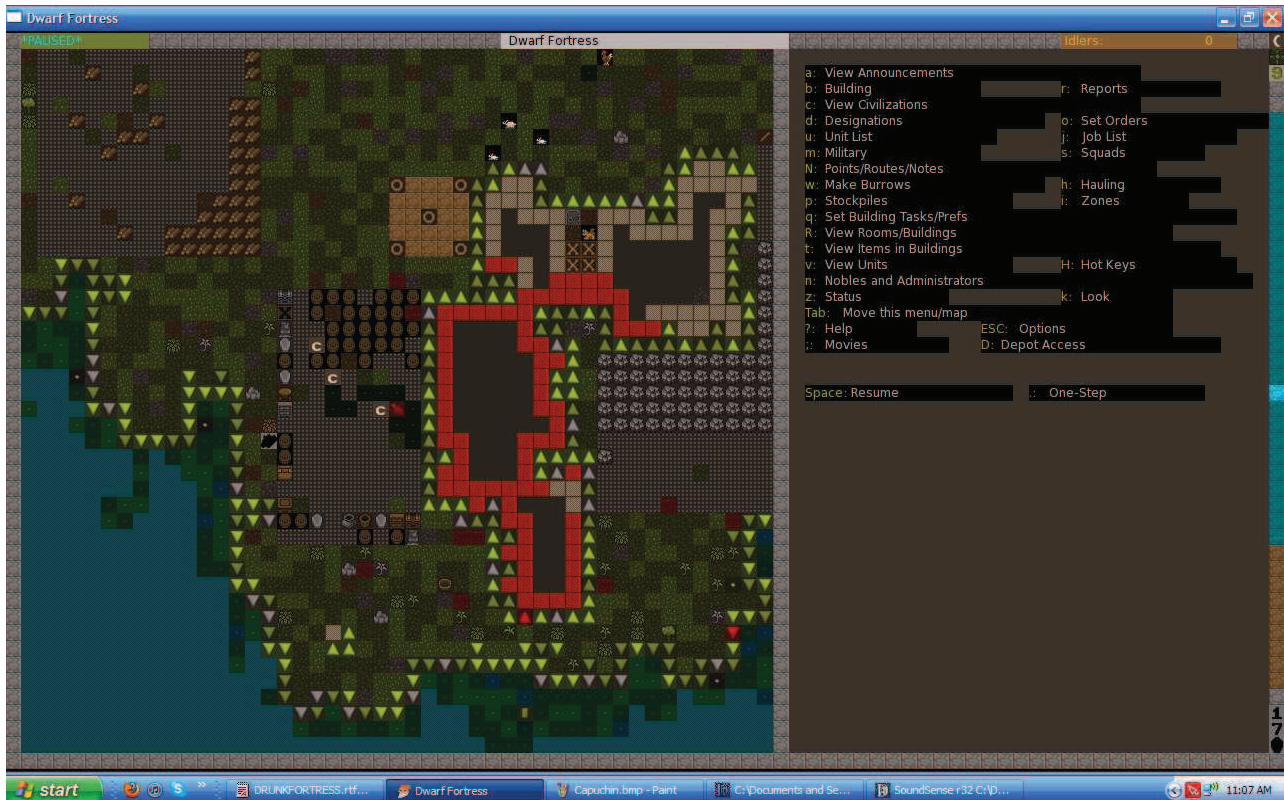

The tiles are hard to see. This is insanity.

Finish Keysont

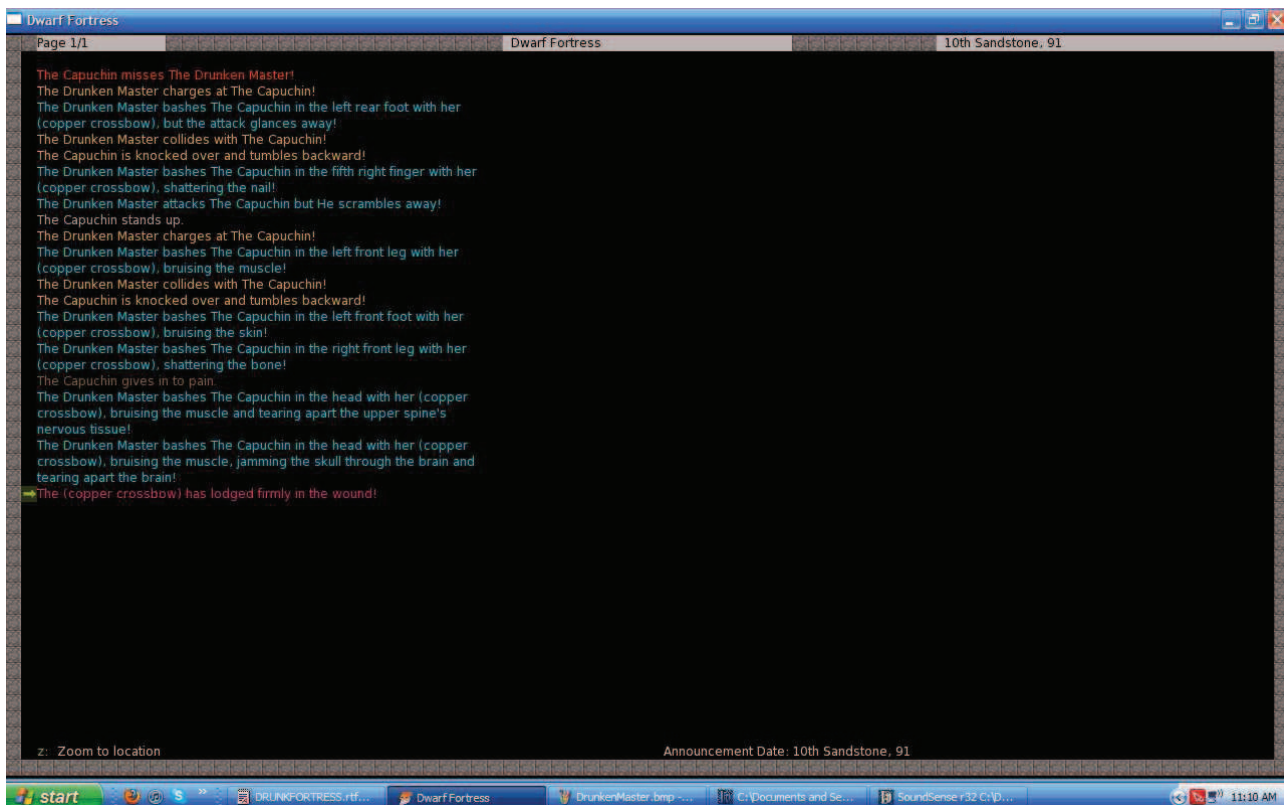

Motherfucking monkey! You get your ass back here with our egg roasts!

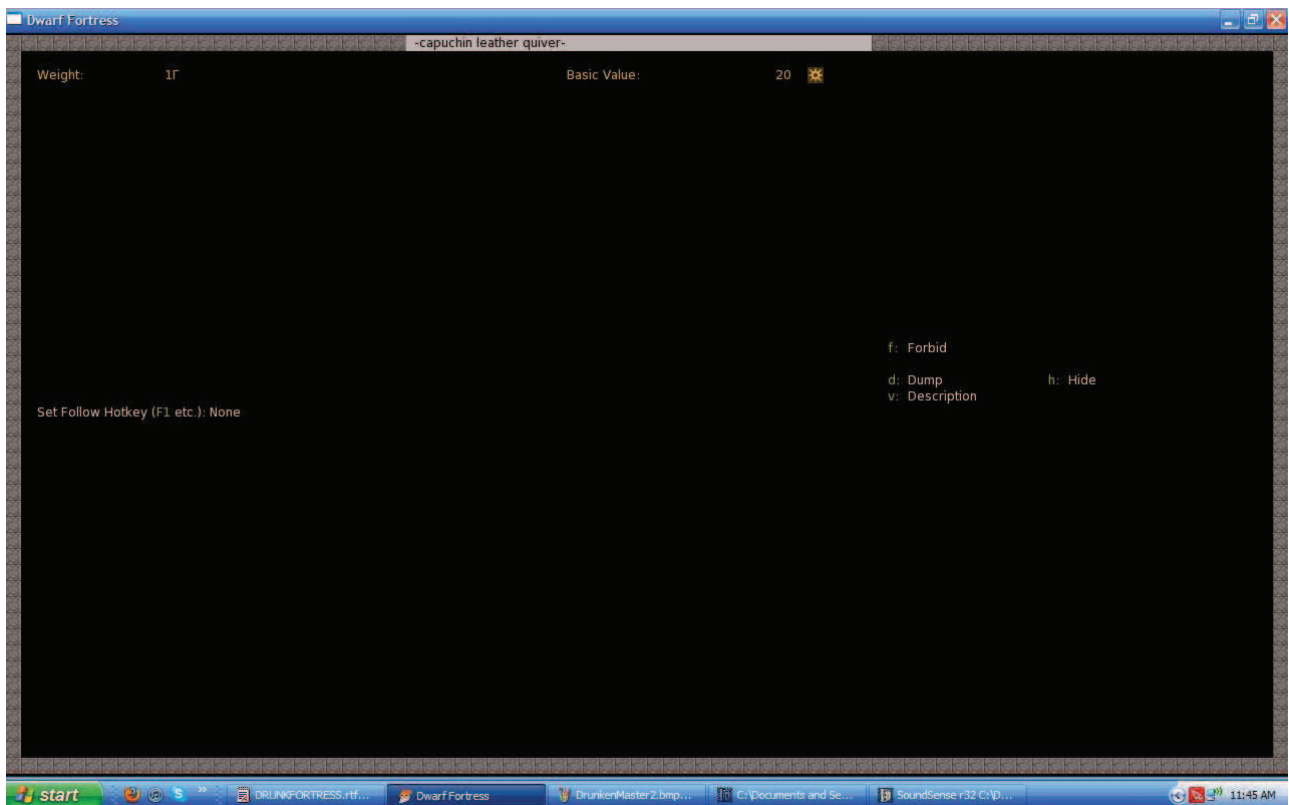

KHANNNNNN

Fuck you, monkey. Don't ever mess with the Drunken Master.

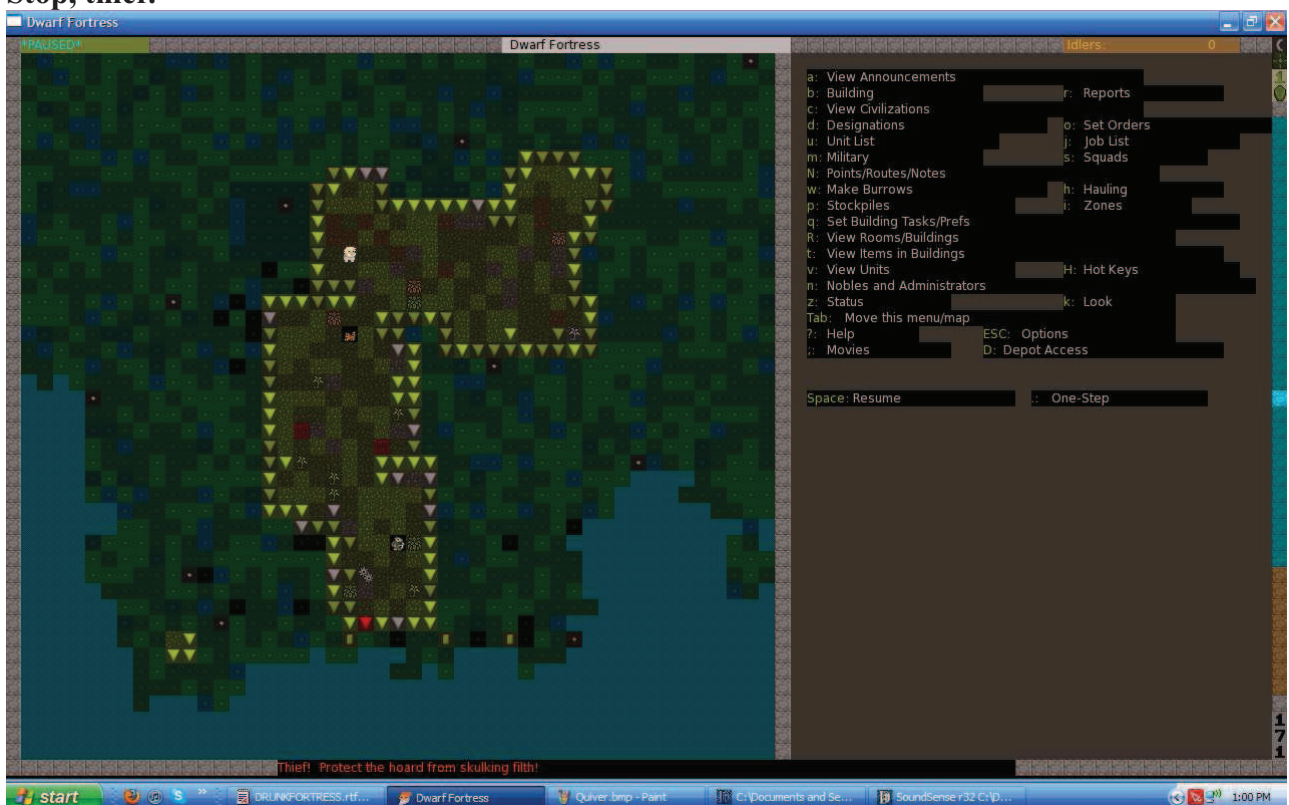

27th Sandstone, Mid-Autum; moar dorfs. Fisherdwarf, Ranger (2)

12th Timber, Late Autumn, caravan arrives. We murder them to the last dwarf without taking any casualties. Just kiidding.

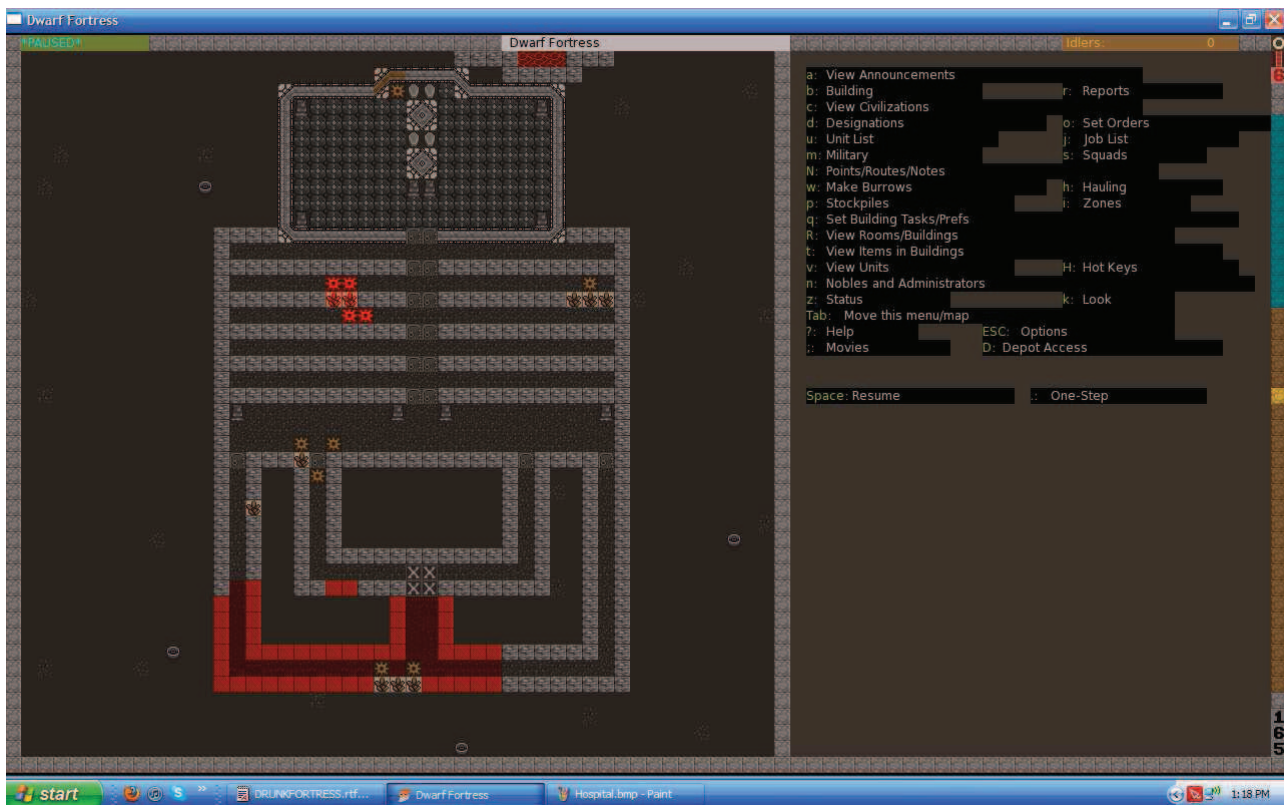

The end of wwinter is coming. So I am building coffins for those who follow me. Built a hopsital across from finished dinigren room.

Stop, thief!

Spring has arrived, and we survived. Finished my grand tomb. Too drunk to write right now. Will upload and type up stuff tomorrwo.

[End journal]

I'm still pretty messed up, so I'll leave it up to you guys if you want to do more of a story/flavor. I figured I'd just make it more image heavy to start. Also, not everyone got Dwarfed yet; only Dwarfed up to Bobnova. I will let my successor do some dorfing 🤪
Original Dwarfs can be found in the OP.

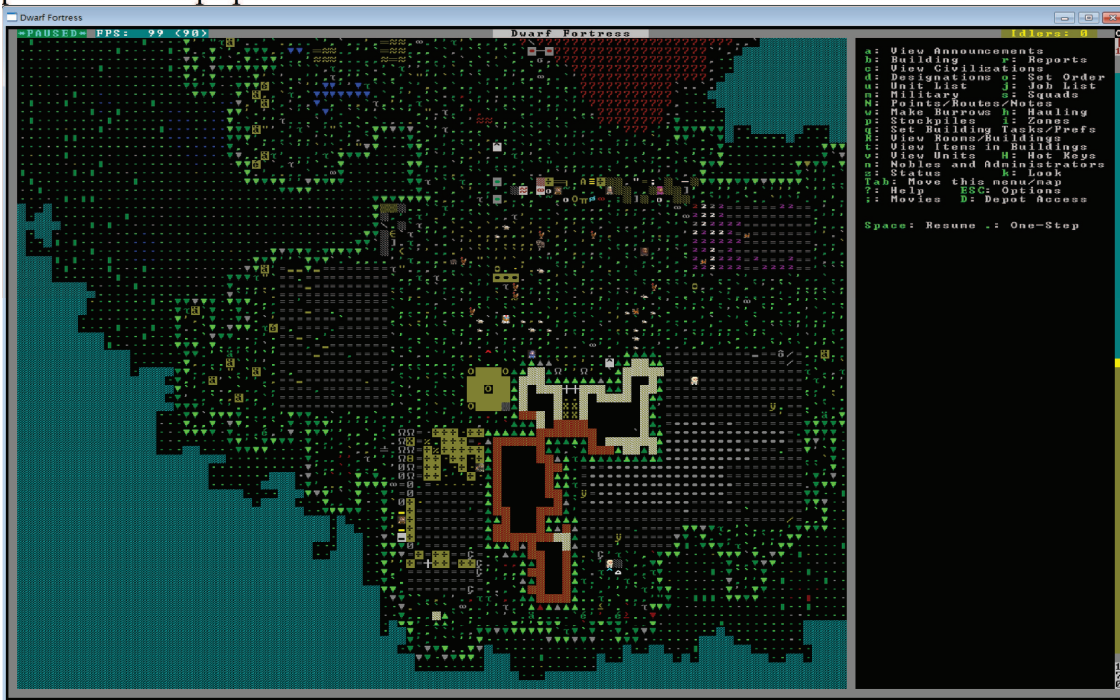

(Wow, this fort looks like a drunk designed it...)

Year Two

Siquo's turn

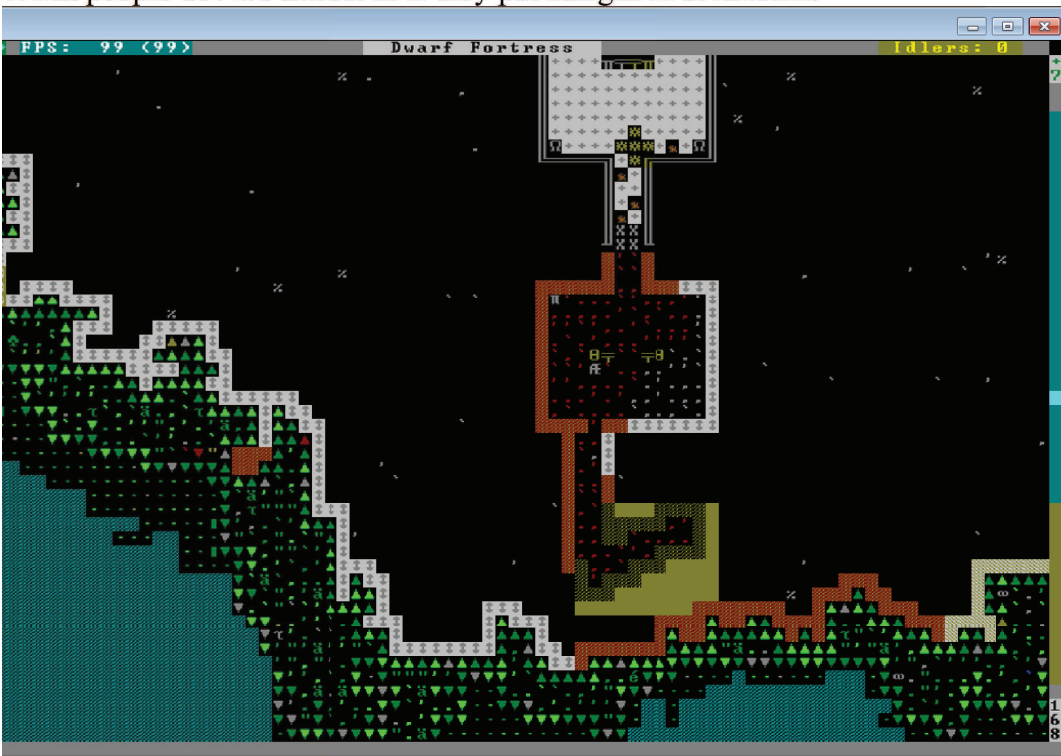

Friend came by, drank 3beers, then went to the bar, watched the game (NED vs HON 4 to 1 Yay) and drank more, next bar drank more, and currently at or about 13 unit of 25c. I use d to be able to drink more but ah well, age and responsibility and stuff you know.

ALRight, finally arrived atth our new home. WHAT... who... this... theres's stockpiles all over the place. workshops placed art random... Who is the architect here? This must be remedied.

First things first, lets get some proper workshop rooms.

What people do? It's almost as if they put htnigns in at random.

1st of Slate, Mid-spring: Miners are otherwise occupied. Drinks are floweng well. Need a piss.

5th of Slate. Beer was good but maybe another scotch wouldnt hurt. Minersare slow. we need prtection get ot work!

Got me a GLEnfiddich 12 yr. GOT better bottles but thatd be a waste at this level of sobriety.

11th of SLate: on the horizon new migrants come our way. Wondert how bad the crisis has hit the moeland i f they travel all the way out here... 25 of em?!

We need more beds... yes, beds, and a dormitory becaues the last one was... weird

21st of SLATe: risen balimush, our metalsmith, suddenly acts weird and refuses to work on making more doors. Oh sure, as if we have time to spare.

Or metal bars for that matter. She seems to crave them.

24th of SLATE: Oh noes! A brown afro weremammoth! Alert the militia!

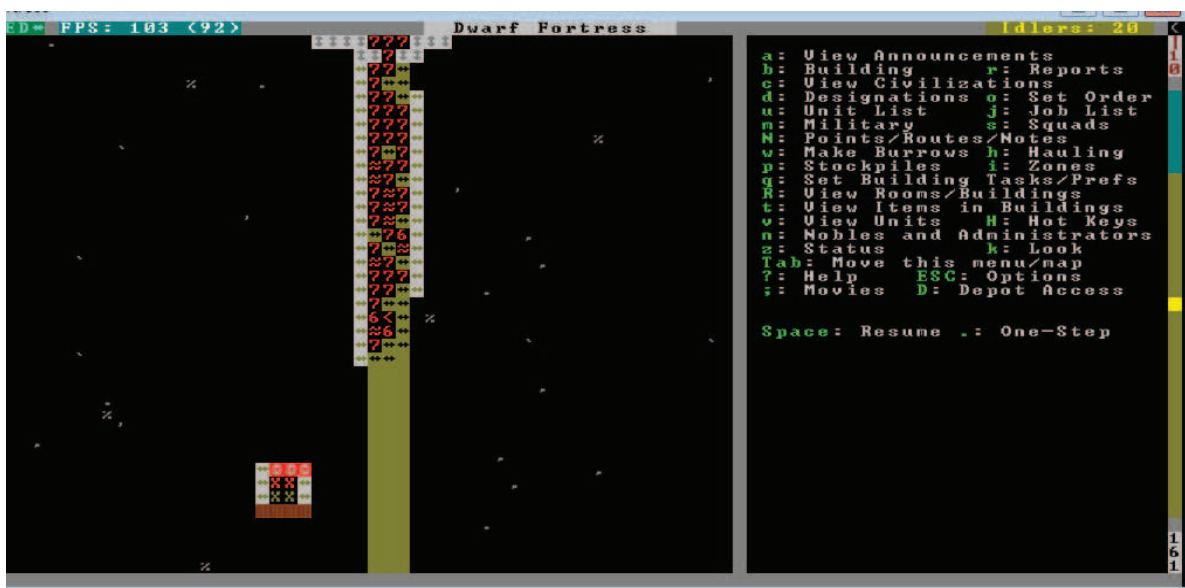

have no idea where it went but bobnova died. somehow.

He shall surely be missed but apparently my fellow dwellers are more interested in taking heis stuff than to actually bury him.

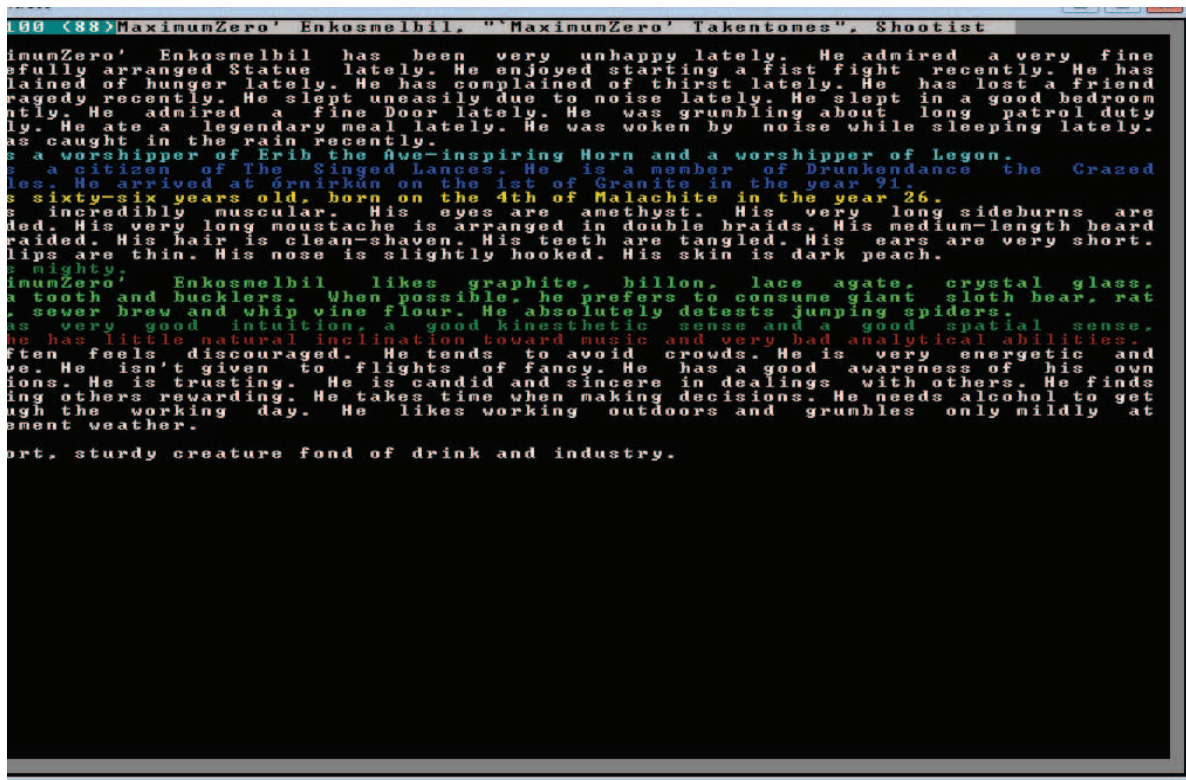

5th of felsite: we're gettnig hungry. Butchering WOW we got a lto of bunnies... KILLEMALL1!!

Oh, Qaaamanen also died. Whoever he was. Whats gogin on whys everyone so thirsty?

Oh breachnig the volcano msfired completely. HOpe I idnt kill too many there.,...

18th FElsite, late spring. maximum zero decided he's fed up with everything and starts punching things. He calmed down, and now has "enjoyed starting a fist fight recently".

Ah, finally the weremammoth is dead.

8th of Hematite: apparently the previous architect designs some stars to be just up instead of up/odwn. That explains why everyone was getting hungry and thirsty...

17th of Hematite: Kamin, drunken master is throwing a tantrum! Well, just as long as you clean up after yourself.

25th of Hematite: more migrants arrived. Wonder why, people die here left and right because of overseer stupidity. Apparently, they don't mind. Dwarves are almost like Americans 😊

26th of malachite: I dunno. Think I just drank the last of our booze. This outpost just might fail... or not/ but chances are... skimming by the minute.

12th of Galena: A fey mood! Praise the... well, let's just see how this one turns out. I think the last one threw herself into the volcano...

8th of opal: at least made some good trade. next guy should have it easier? Time to get drunk and leave this job. fuck this fort, I say. I'm gonna go see if the brewer made something yet.

28th of opal. Some guy started constructing something. Some... thing I guess. Glad there's finally one who doesn't kill himself.

WHAT

A schist amulet?!

ok that's it. The last straw. I'm gonna go get some sleep now and build a small tower. because.

OHNOSE a n ambush!

Th emilitia made work of that!

... Still don't knww where my miners went...

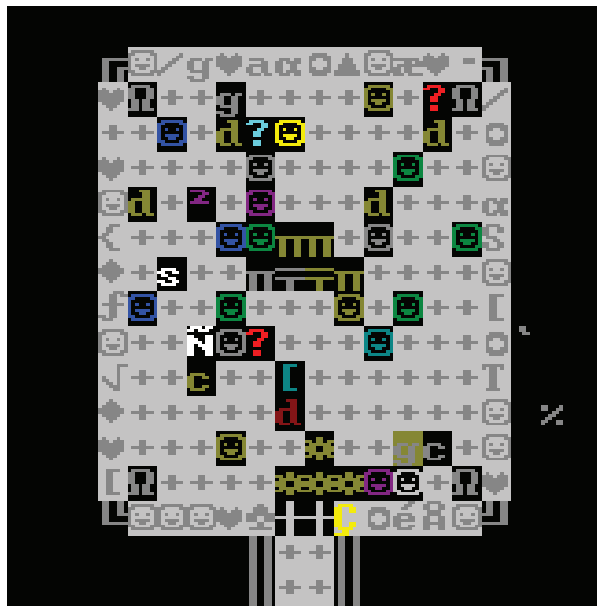

Year 3

Jervill's turn

The fortress seems workable. Even has a pretty outdoor area.
For being a manager, Siquo has not even commissioned coffins I mean coffins to be built.
And yet I see a dead dwarf in the refuse pile.

Also, a staircase going nowhere on the top of the fort. The fuck.
Nice dining room, something's going right.

Wait, is that a ghost?

Also, I have no idea what's going on at level 165.
Couldn't find image.

I think there's some sort of potential magma smelting accident, or something...I'll try and add something to help it.
Removing the wood stockpile, this is ridiculous. Use wheelbarrows, come on. Dig, you fucking dig.
Dorfed self.

Crap, we have *three pages* of animals...most unavailable, we really need a butcher's shop and tanners'. I may set up a minecart path.

Why the fuck is the food stockpile outside?

GRAAA...the animals keep breeding....I can't slaughter them fast enough.

With new migrants, I turned this weirdo area into a new bedroom complex.
[Kamin's tomb, image missing]

Decided to start building some coffins. Yay, no more ghosts!
We need some traps, traps, in the common tongue.
Uh oh, Kamin is throwing a tantrum!
I still have a ghost...don't know where his remains are, though.

Hooray elves! I need some cloth!
FUCKING GOBLINS.
A vile force of darkness has arrived!

The battle is joined!

I don't know what happened!

EVERYTHING'S ON FIRE!!

The siege is broken! We are victorious!!!! Also, the exterior of the fortress continues to burn.

Also, got the two microcline slabs up! No more ghosts!

The elves made it through the siege! I traded some pond shell crafts for booze.

A diplomat has left unahppy. Ops.

We have a mayor now.

More migrants for our glorious fort! They'll sleep on the floor.

Humans have arrived! Welcome to the plains Apes!

Moved to metalsmith's pforges inside the fortress.

So...many...puppies. Well, straight to the butcher shop they go!

Ahhh....yeah, hit copper! Finally, some METAL.

Bought some booze from the dwarven caravan for next year, didn't bother with anything else.

Sorry about the lack of images after spring, but it got kind of dull after that. I moved most of the stockpiles indoors, and tghe magma forges behind the exterior walls as well.

Year 4

Wrex's turn

Tonight, I will be drinking the FOur horsemen: Jim Jack Johnnie and Jameson. Let's get this started right!

3:40- started mixing six shots. finished 3:55.

Dear god that is a shittone of whisky.

3:57: Downed a gul[of bailey's to cap it off. yum.

so lets see that trianwerk Kamin built.

Half the fucking fort is built above groun. This place, looks like a nightmaresh hellhole that can only rmeind me of the greatest shitfuckings in DF history. Esverything is covered in blood. there are thirty diffrent entrances. we have six military dwarves. Everything is stockpiled outside. There is a named magma crab in our lava pipe. Welcome to fucking Drunk fortress, where everything is on fire. I can only nimagine the shit going through their heads as migrants walk up to this place. Everything is done wrong! wher is our trap corroder? Boatmurdered has a fucking trap corrodor! Are they nto good enough for ya, jackwads!?

So, my first concern is defense. And a tomb,. sexy sexy tomb. A tomb that makes you all jelly. I order forty traing spears made. And I take a shot for being a pussh and using danger rooms. We have no fucking armour anywhere. We have no proper defenses. we are fucked.

4:04- Took another shot. Because fey mood!

Expanded the smelters. Got the mayor the fuck out of my room.

4:27 Took another shot. Obsidian swords are fucking useless. Making them glass sharp now. glances off skin way too much.

Vampire. Fuck him. 4:42 takngi a sht. FOund the bugger. How do you like filling my magma tomb, huh punk? I hope you enjoy that magma shower. Guy went insane. Stark raving.

SHIIIIIIITTTTTT MEGA SIEGE OH MY GAWD WE ARE SO FUCKED THERE ARE LIKE FIFTY OF THEM. Updating after we die. Also will post pictures later maybe tomorrow.,

And the same explained in slightly more sober state.

Okay, completely sober now.

So, here's what went down:

THis is the entryway. I have no idea why it is layed out like this. It's utterly retarded. There are still ramps all over the place. I couldn't find a lever for it, anywhere. I don't think anyone remembered to hook it up?

The Voracious Cave Crawler lets the 'Kamin' Shadmalcerol Zengodunnos Deler's right lower arm drop away as He attacks.

 'Kamin' Shadmalcerol Zengodunnos Deler, Drunken Master has bled to death.

Kamin is the first to die. Probably for the best, since he only had a copper battle axe. That's about it. I made him some armor, but he refused to put it on. No shield, no armour, nothing.

The manager is having trouble breathing!
 The {{silver long sword}} has lodged firmly in the wound!
 The manager loses hold of the (llama leather left mitten).

The flying ({iron bolt*}) strikes The Bone Carver in the head, tearing the muscle, fracturing the skull and tearing the brain through the x(giant cave spider silk hood)x!
A tendon in the skull has been torn!
The Bone Carver has been knocked unconscious!
+ `Jervill, Greatest Pony' Mengimesh, Bone Carver has been found dead.

Jervil is shot in the face, his corpse slumping down in the middle of the "O". I think he would have wanted it that way.

Now, at this point, everyone outside is dead, and everyone inside is about to be. The main bastion of survivors is the dining hall, and the goblins that trickle down there one at a time are mobbed and killed, but not before killing the odd dwarf. People start going insane. At this point, there is no military left, really. MZ, Talvi, and myself are holed up there too. A wall of dwarves throws itself against the oncoming riders, and it takes quite some time to fight through them, before you know, we all die. At this point, I buy the farm.

A ligament in the right ankle has been torn and a tendon has been torn!

To be fair, I was gangraped by giant worms.

A tendon in the skull has been torn!
→ `Talvi' Tölvúvutok, Wood Burner has been struck down.

Talvi, is ironically enough, killed by a pike.

Now, MZ is also in the main hall. He is out of ammo. His right leg is torn open from a pike stab. He is starving and dehydrated. He beat three goblins to death with his steel crossbow.

ANd he is about to send some motherfuckers to hell.

He then proceeds to charge straight into the enemy front lines, kicks the shit out of a bunch of cave crawlers, and gets the fuck out of dodge. I abandoned the fort, actually (With like 12 guys left, with almost all of them incurably insane), Just so his act of badassery would not go unrewarded.

Also, Obsidian should cut flesh now.

Year 5 (Reclaim)

Clover Magic's turn

17:01 - Started drinking, vodka mixed with green tea. Have already made interesting discovery in that this ended up tasting like Taco Bell cheese for a while. Downloaded save.

17:07 - Have moved on to just shooting vodka chased by the tea, tastes less like shit. Also don't shoot marshmallow-flavored vodka straight you will regret it.

17:09 - Chocolate one worse. 4 shots in five minutes is bad idea, small pause.

17:11 - Have tea-flavored vodka, put in tea. Much better. Equivalent of about ~2 shots is in my tea now, will drink it and relax. 30%, 30%, 35%, and 40% alcohol so far of vodkas mentioned.

17:16 - Feeling a little weird.

17:19 - Vodka kinda hits you all at once doesn't it.

17:20 - Well definitely am buzzed, will open game, continue drinking. Will also take a shot everytime a dwarf dies, seems reasonable.

17:22 - Basically 8 shots is bad idea. AM reminded of time that I puked in friend's vart.

17:23 - lolol Jungle of Flashes

17:25: Will try to dwarf everyone as I continue drinking

17:27: Bad ideas feeling sick./ Will continue for great justice. If puke then I will well be dwarven.

17:29 - CAN'T OPERATE CONTROLS

17:32: Kamin got dorfed as a girl cause everyone else is not badass. This reclaim party sucks.

17:34: Only one dwarf who likes rum in preferences, Peregar gets to be a girl/

17:35: Pressed wrong button for several minutes, I think, I'm hammered

17:35: Girls girls everywhere

17:36 - Can't work controls again

17:39; - I live alpacas. This not backspacing is hard.

17:41 - Always need cheesedorks why not

17:42: CONTROLS ARE A CONSPIRACY

17:43: Dorfed everyone from pg 134 on. If not dorf you get to be migrant. Xanadorf, Kamin, Captain Peregar, miskop25, GretaWormEthanol, Clover Magic, and Geen are reclaim party.

17:45: Not enough points to bring alpacas, am sad. I think I have three military dorfs. AM so hammered, starting. Gotta pee first though.

17:47: Trip to bathroom interesting experience. I have spider in my bathroom, will name Mr. Samasa. Nased black widow that once. Can't stay straight oh god so much vodka.

17:49: Not enough points to bring alpacas. Devastated./

17:49: Peacocks, though. Peacocks are always necessary.

17:51: Only have money for copper warhammer so Captain Peregar gets to be hammerdorf

17:52: Group name is now the The Defense Syrups aww yeah.

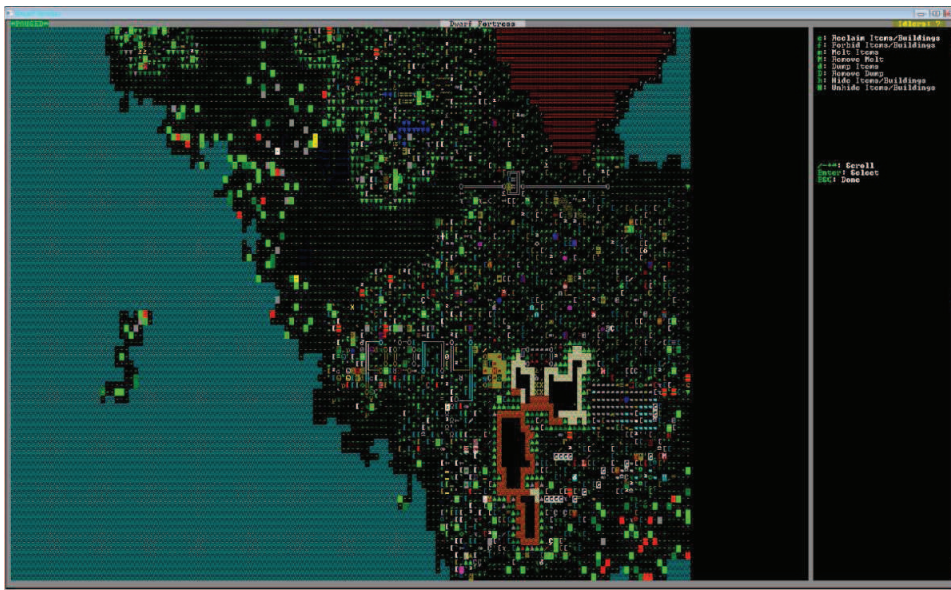

17:54: Why won't FB post so sad

17:55: Am blasted, so embarked. Lol friendly goblins, well that will let me get underground. Will start [aying now, cheers!

Also Wrex == am girl, have less alcohol tolerance, have drunk about ~10- shots right now. I love vodka.

Oh ya and edit: We ran out of dorks so you will have to wait for migrants.

-EVERYWHERE. I apparently decided "fuck that" to the main drunken fort and have everyone in a tiny two-level affair down in the very bottom of the southwest corner. There are labors assigned apparently at random. We have a grand total of 8 dwarves, of which only 5 are actually working since two are on break and the third, my dorf, is in some sort of stasis in a bed where almost every body part is red/yellow and I'm labeled as "heavy bleeding" and "cannot breathe" in the health screen but I've been that way for two seasons now.

-Also apparently Geen ripped off the magma crab's wings before he died. I was unaware magma crabs even had wings.

You find a journal. It is bound in blue peacock leather and studded with goblin bone. On the cover is engraved a picture of a dwarf. The dwarf is in a fetal position.

Bobnova's Turn

A shot timeline!

#1, ~20ml, 12:16pm. Tito's with Blueberries I threw into it last night. Tasted like titos, which is pretty good.

#2, ~33ml, 1:30ish pm. Viking Fjord. I love this stuff.

#3: ~33ml, 1:40pm. Post-hot-shower. Viking Fjord. Still good.

#4: ~35ml, Not long after #3. More Viking Fjord.

#5: ~33ml, 1:55ish.

#6: About to be taken (~33ml), 2:18.

Then disc golf.

Then DF.

(6:01pm pacific): Two shots down. Not drunk enough (again) yet.
Re-upping the drunk level can be tough. I'ma go take another shot.

eDI:R(6:45pm pacific) make that four. Still not drunk enough. Going to go take another.
This *will* happen. partly because I absolutely (&@#%* love the concept of Drunk Fortress (brilliant! Seriously) , and partly because it has official authorization from Fiance.
I don't exactly *need* that, but it does mean that I'll collect less excrement for doing it.
Leaving now to go take another shot. Or auf duetsch, "doch, noch ein mal!"

Ok so timeline, there're the above drinks.

Tjhen.... I don't really remember, but another 4-7 or so. I killed the bottle.

Poor Viking Fjord 🙄

Is dead.

Tragic.

Tjthankdfully I still have another couple shots worth of Titos.

After that it's beer.

**** beer.

Bobnova's Quote of the Livestream

Year 7

Scruffy's turn

Since I don't have any vodka available at the moment (my usual drink), I will unfortunately be drinking milder drinks:

My own ~16% herbal liqueur and 18% apple wine (will drink after the ciders)

2x500ml Frosty Jack's 7,5%

2x330ml Old Rosie Scrumpy 7,3%

A pint of Bulmers

500ml Henry Westons medium dry 6,5%

I already started preparing by having 2 white russians (vodka, coffee liquer and milk) in a pub and starting to drink the scrumpy.

I seem to be making quite a few typos. 🤪

I forgot my dinner in the oven. Crispy. Time for a pint.

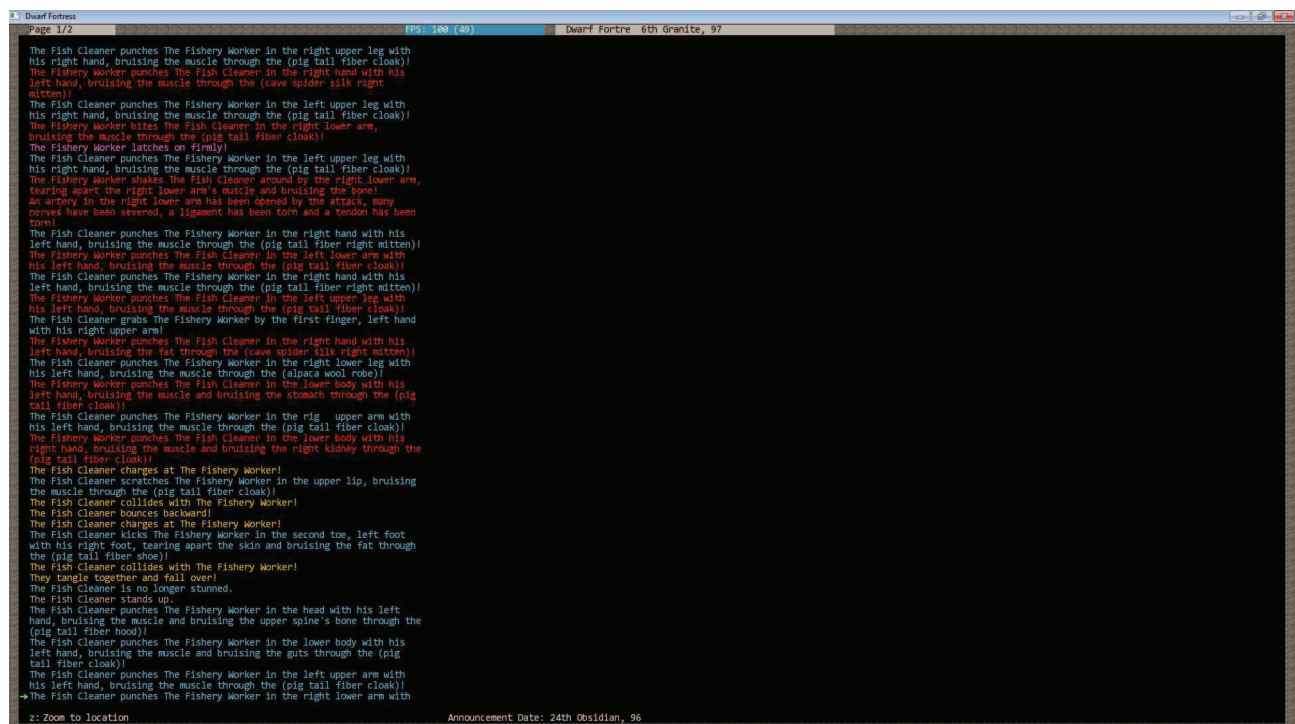

I suppose I am drunk enough so lets gets dorfing.

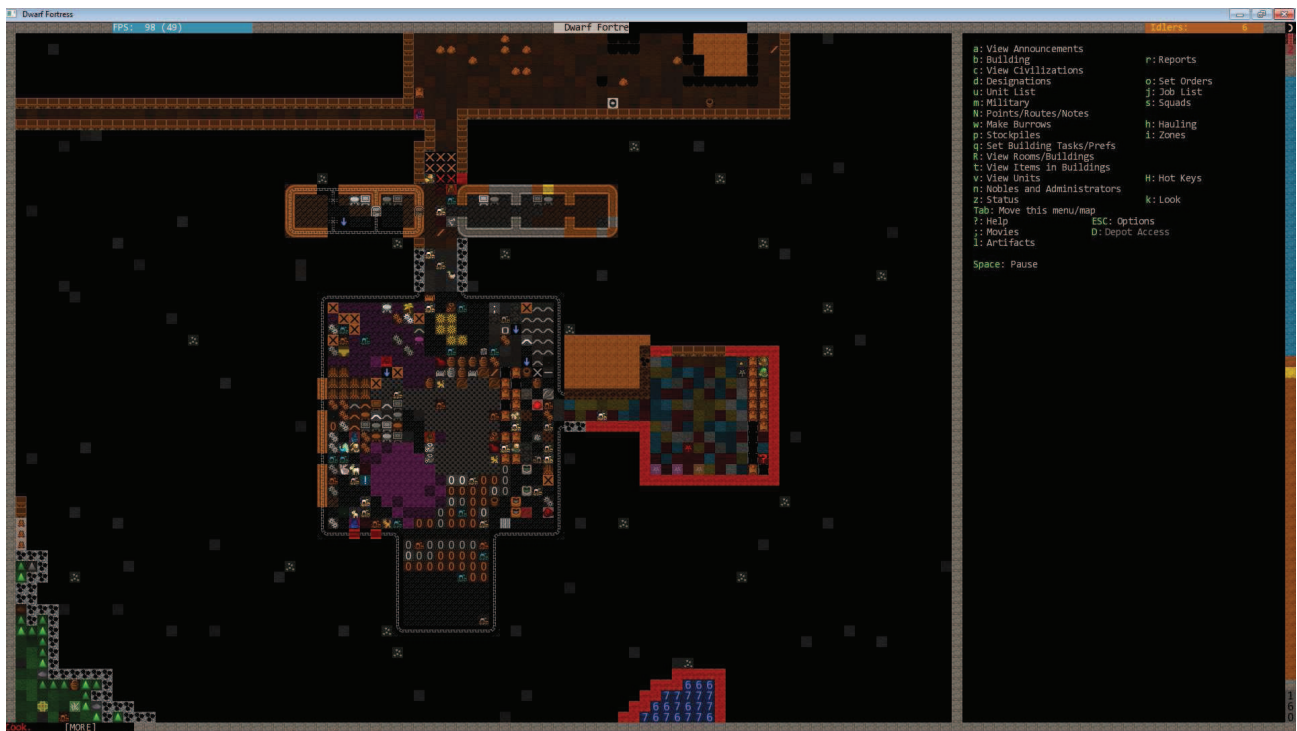

Bah, running hte fort with phoebus causes so many strange texttrues.
Should have done a clean install.

3rd Granite

Named some poor old fisherdorf as Scruffy. Why is everyone so unhappy? Man, this fort is a mess. Seriously, what the heck has bee n going on.

Poured another pint. Starting to feel somewhat drunken. Bobnava is tantrumming along with half of the fort. Seems like a fishery worker tried to hurt poor old scruffy. scruffy killed im.

That should show him. Ordered the other stairway to the depths to be sealed. Too many crawling thingies killong the dorfs. Funny thing, there is a cave crawler named mato. Mato means worm in finnish. Worms tend to crawls.

10th Granite

Out of booze. Where the heck is the still and kitchen? Serously, wher e the heck is it? We were missing a wront gate. build us one. Got rid of hte darn stairways to the top. too many critters crawling in. Found th ekitchens. The entier upper fort and buoldingxz was forbidden. poor dorflings couldnt brew more booze.

15th Granite

A farmer was scaring all the dwarves. Kept trying to kill them and all. DFussies. A goblin killed him soon after. Hurray! Wrex is punching peasants. An ogress seems to be killing goblins.

26th Granite

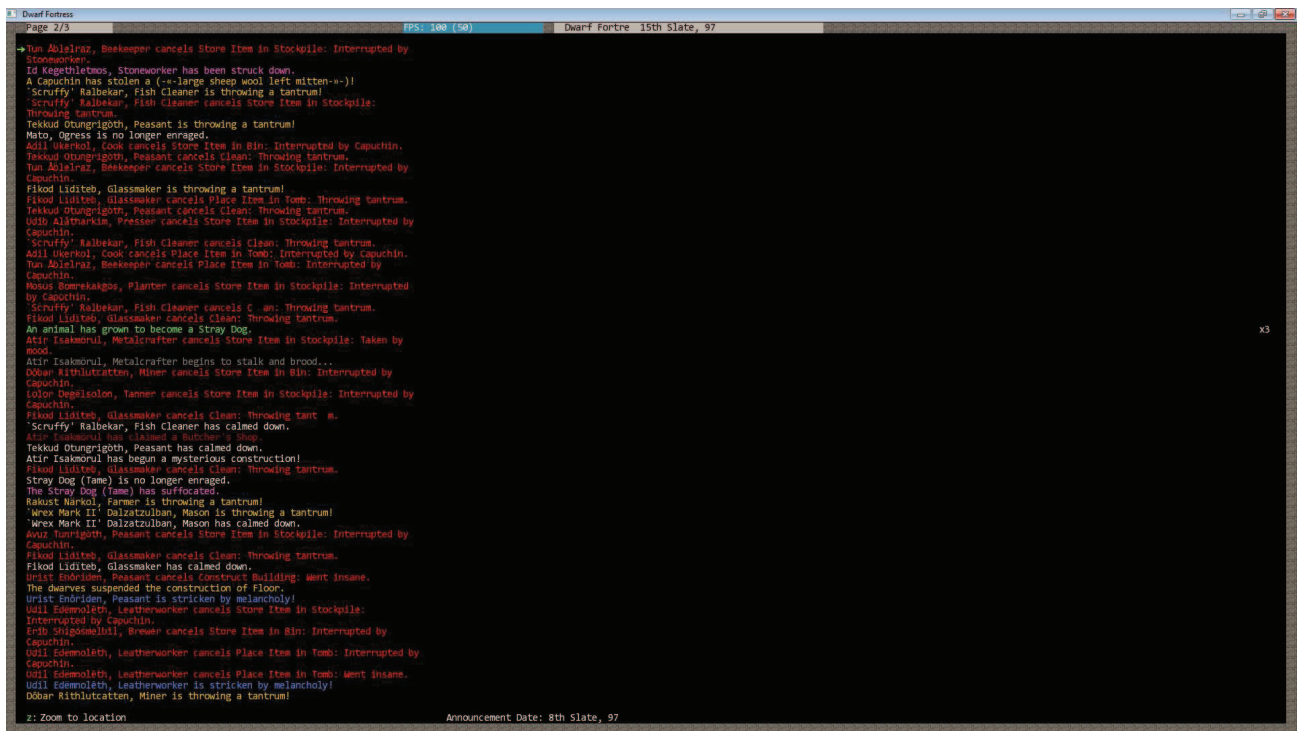

Ok, seems like i hav passed the point of intoxication and entered a state of drunkenness. What the heck is with these controls? i thought that kitcher was in hte z menyu after stocks, tnot before. Argh, my spelling. Better pay more attention to it from now on. I have to fix every 'word after writing it yet I still leave errors. Better leave atleast some in. Adds flavor. Bobnava seems to be running around naked. mad as a kobold i say.

5th of slade

Just found the bedrooms. This fort is a messl.

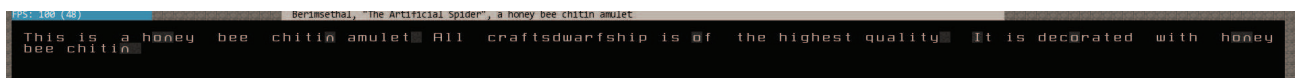

Screw this

Scruffy likes sheep? what the heck? what am i? welsh? I need anothe4 pint
What the heck is a capuchin and why is it killing my dorfs?

20th of slade

the fort is doomed. everyone has been tantrumming since i started and they only stop fighting in order to pass out or to kill someone. Someone started brooding and made a honeybee amulet.

26th slade

We got migrants. 29 of them. all sane and mostly well fed. we are safed! The original inhabitants seem to be slowly killing eachother out. Who is this cheese mistress and why is she interrupting everyone else?

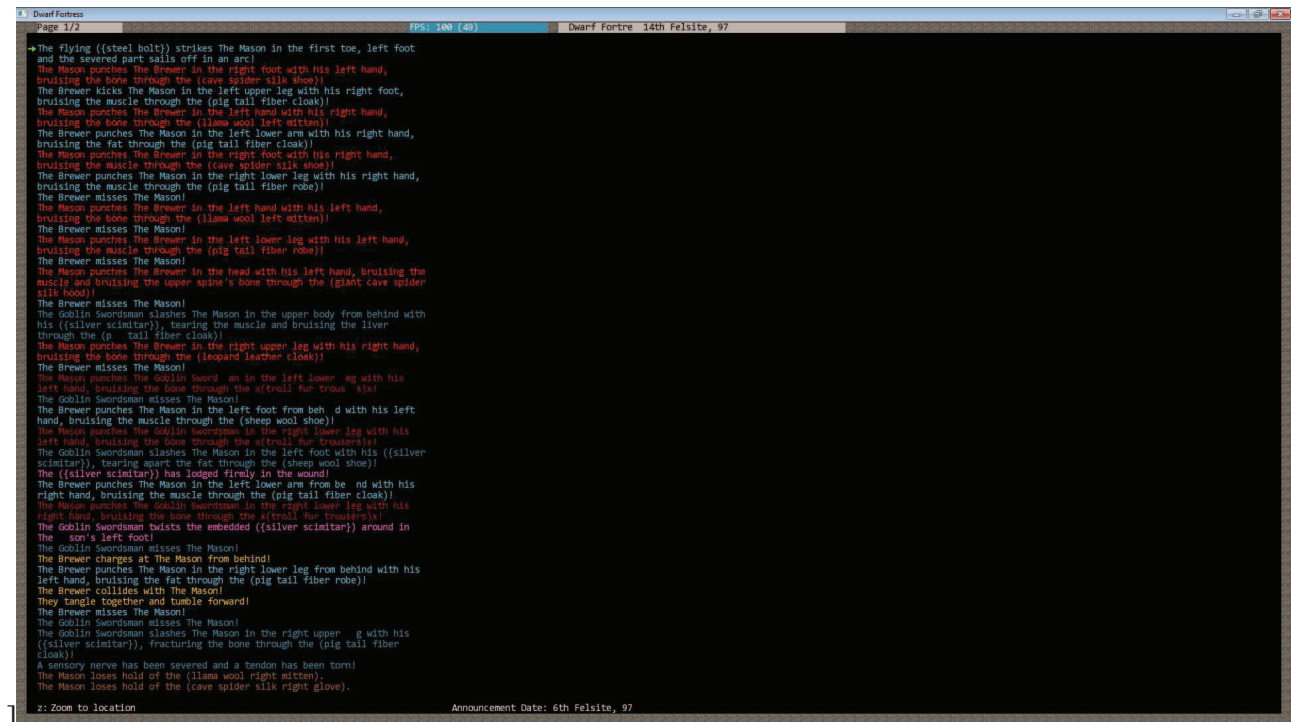

Someone destroyed the gates. Again. Also, clover and wrex are still trying to kill everything with a beard.

10th felshite

seems like Clover and Wrex have finally stopped. Wrex went insane and Clover got clobbered by a farmer.

Alsom Why is tere so muvh pee? Next time must stronger drinks, not liters of weak ones, Time for another pint.

Wrex's final moments:

20th felshite.

Elves! Stinking elves! Come to steal our corpses and pollute our precious bodily fluids.

bobnava bobbed his last nava. Just as dead as the rest of the fort. many of the migrants have already been slaughtered.

25th felshite

Do we have a depot? Captain Peregar is the only living named dwarf still tantrumming. (or living)

The mayor is killing dogs and peahens.

Screw this, I'm building a safe haven for scruffy junior, son of scruffy.

8th hematite

I'm concentrating all our remaining resources and sane dorflings on building my safe little spot for scruffy, away from all the madness of the fort.

What the heck is this? Scruffy junior likes reindeers and actually saw one recently? I have gone from being welsh to being lappish. What next? poodles?

what do you mean they are starving and dying of thirst? No water to drink or mushrooms to munch? let them drink whiskey and eat cake!

Finished digging us an above ground farm.

5th malachite

The dwarves are killing a herd of rhinoceros

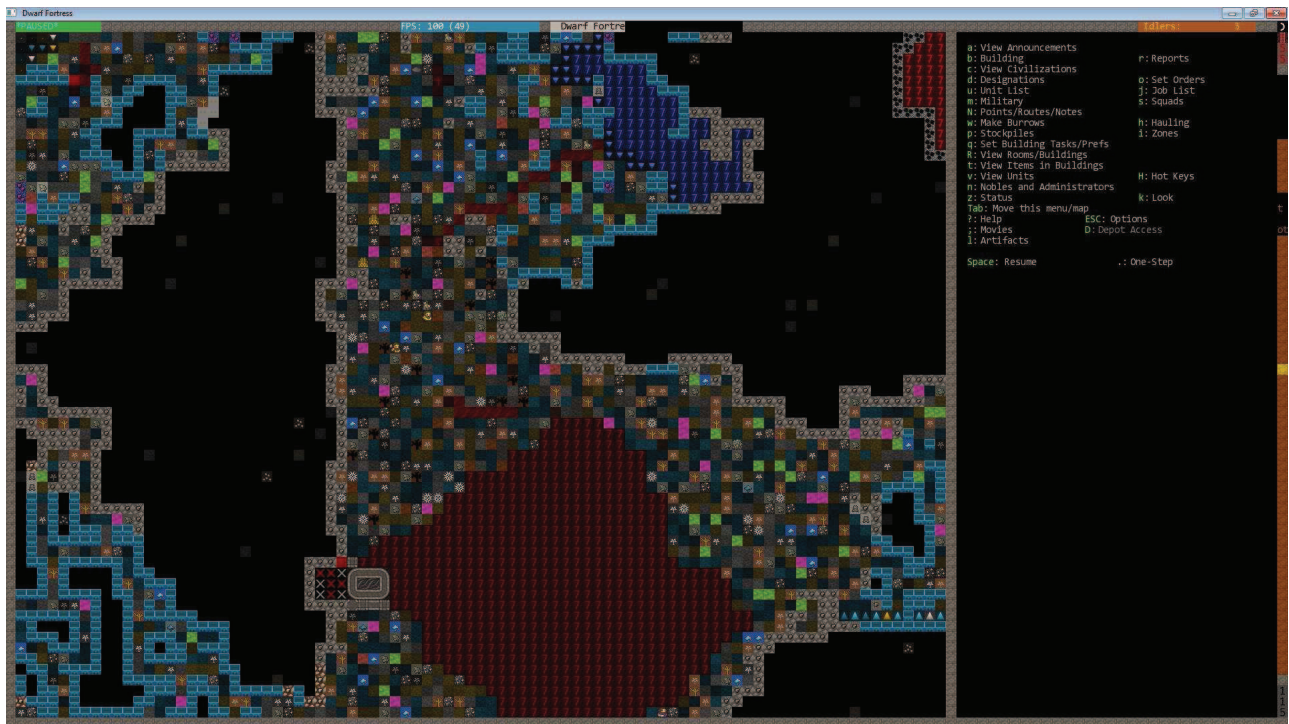

Lost count of my drinks. Bollocksö!

11th Malachite

12 more sane dwarves have arrived!

19th Malachite

Why are the troggolytes killing us? I didnt know that we were in the caverns.

10tu gALENA

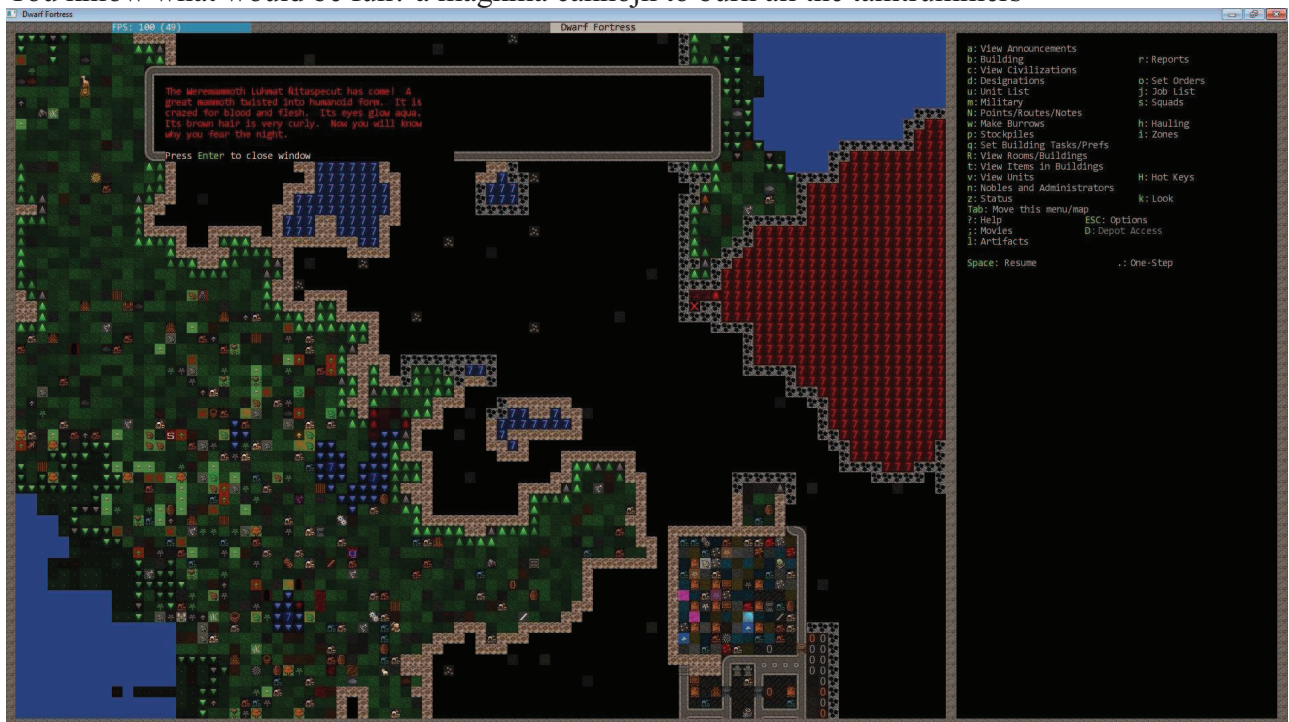

Started filling the above ground farms with water

18th galena

A weremammoth and a caravan full of humans? Why the heck would they want to come here? there is nothing of value in here-

There are dead dwarves in the new farms! Oops

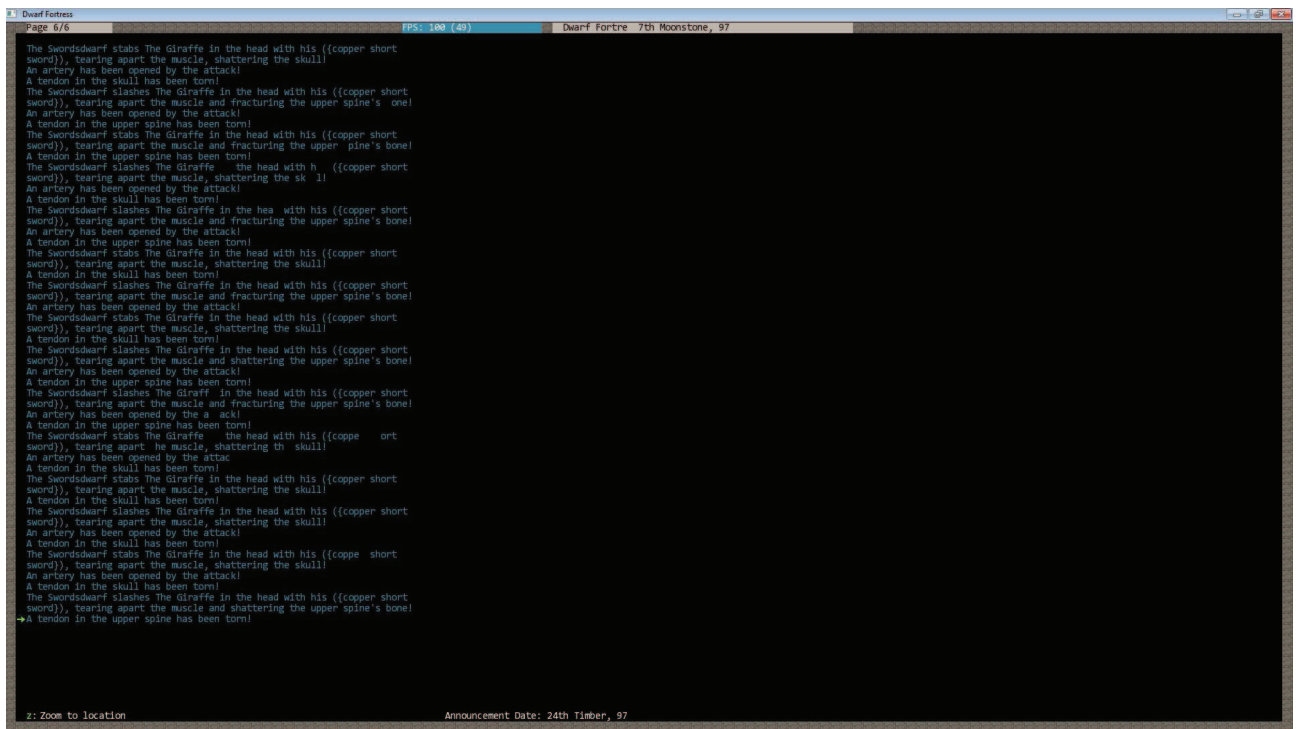

You know what would be fun? a magma cannon to burn all the tamtrammers

7th klimestone

I ordered a carpenter's workshop to be built motnsh ago but I still hasnt been build. Unsuspended it and it got suspended again by a "interrupted by a giraffe". what in armok's name is a giraffe doing in the middle of our fortress?

Realized that the new farmlands wer e not in soil. A swordgobbo is stalking them from one level above
ghosts are wrecking havock in the fortress. One is howling and one is constantly flipping over tables.

17th Limestone

Where the heck is our depot?

Ran out of cider and realized that I had already drunk a glass of my own brewings.

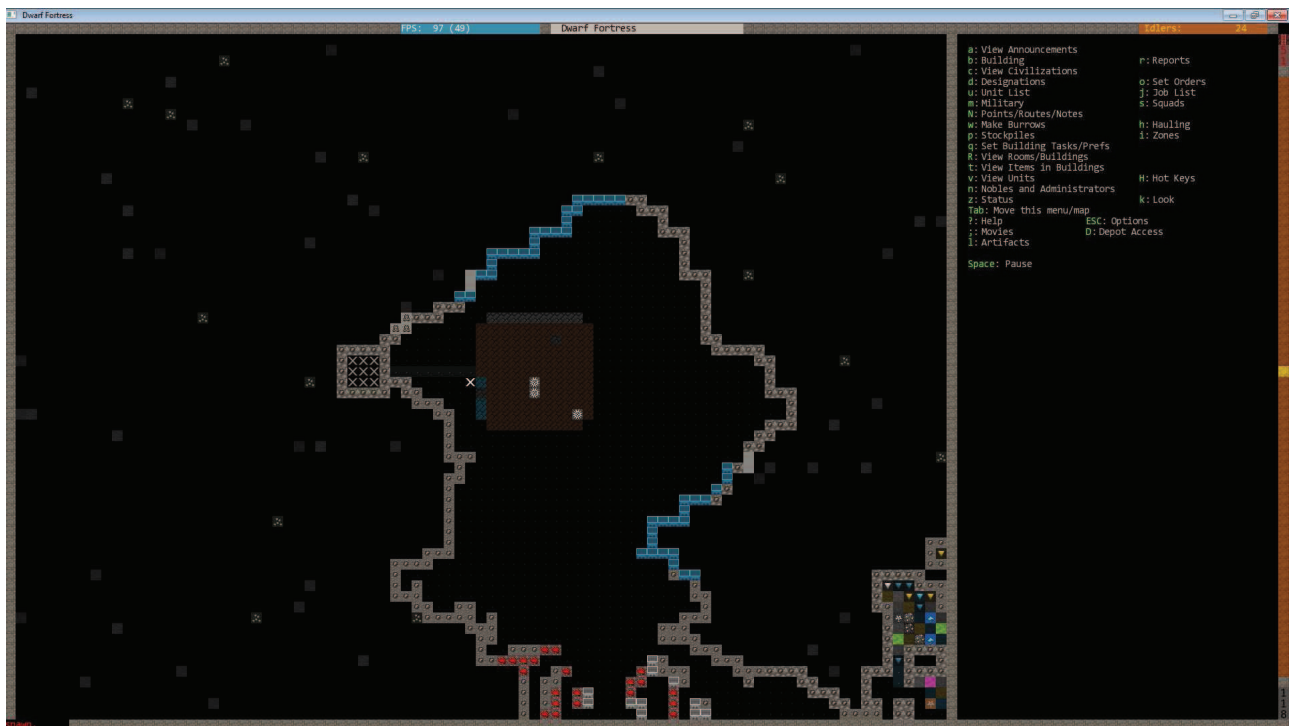

20th Limestone

15 more migrants. Funnt things. No matter how many more we get we stiöö dont seem to be growing our bpopulations

7th Sandstone

Seems löike I have aved the fort from dieing of thirst and the dorfs have stopped tantrumming (too much). Havent had time to dio much else.

Why is there cave spider silk on top of Scruffy's personal haven? Bloody builders, always playing with animals instead of building

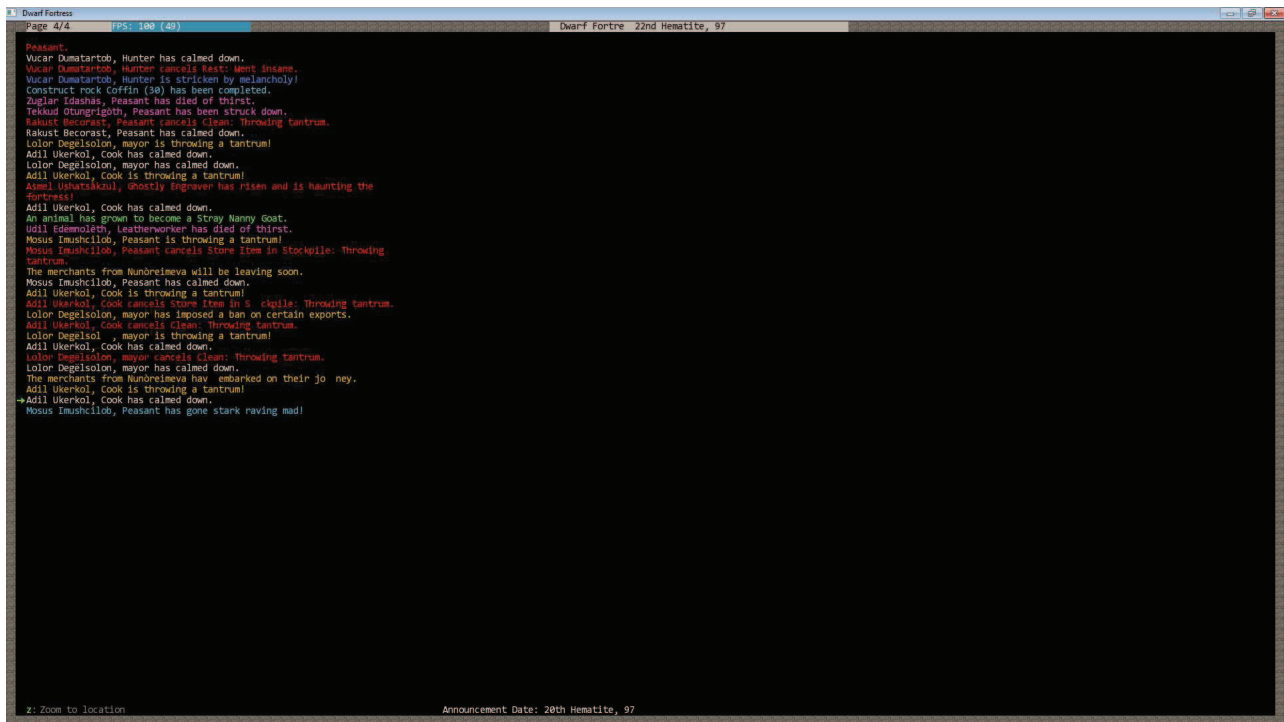

8th timber

The fortress is a mess. I stopped trying to make sense of it a long time ago. Continued with the magma cannon that serves no use. Improved brewing capabilities.

Realized that our military capacity from the last year has been a signal dwarf with a copper crossbow.

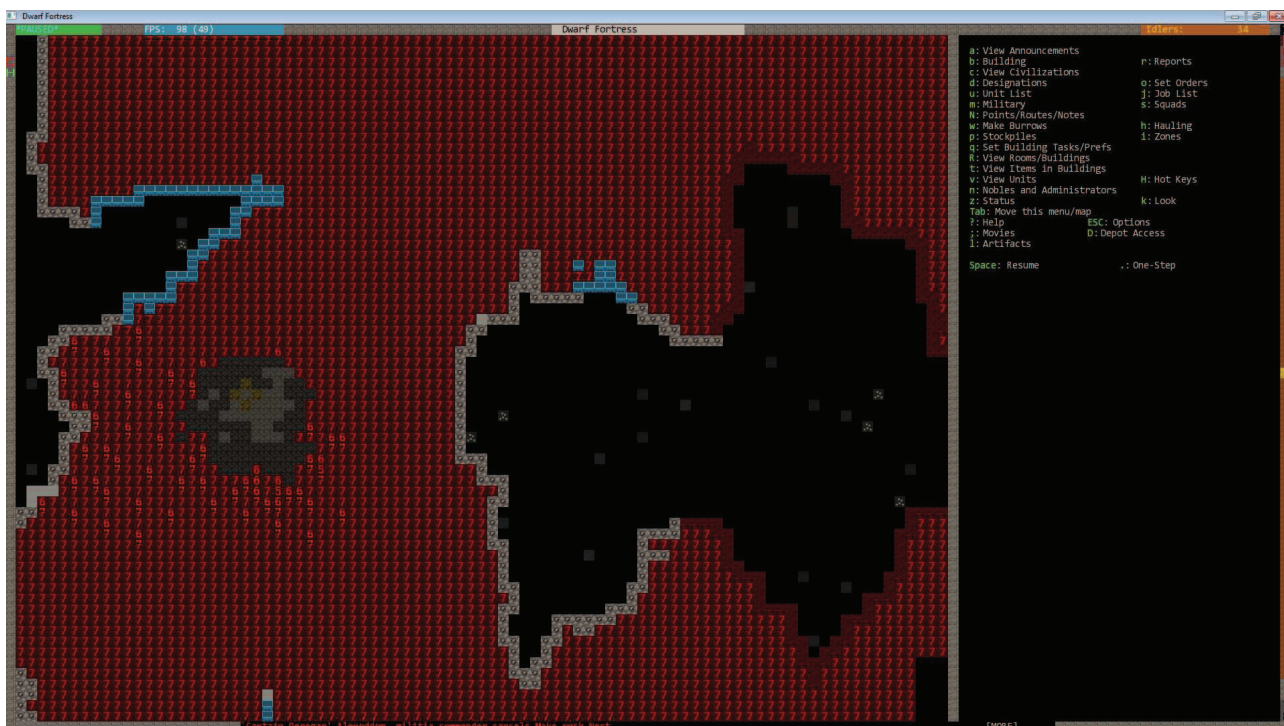

Werehedgehog. Took me a moment to realize that I was in paint, not df so no commands were getting registered.

13th timber
 Ambush. Curse them!
 Realized rtht my lever to the gate wasnt linked. Crap

16 Timber
 The last stike on my magmaelevator was made. A glorious pile of rocky junk crashed dpwnm.
 Crud, instead of a glorious stairway to hell I ended up with a big hole leading ot nowehr

6th moonstone

Our farms were set to use fertilizer. No wonder we were in trouble.

Made some hammers. Turns out that our only crossbowdwarf was a hammerdwarf without a hammer.

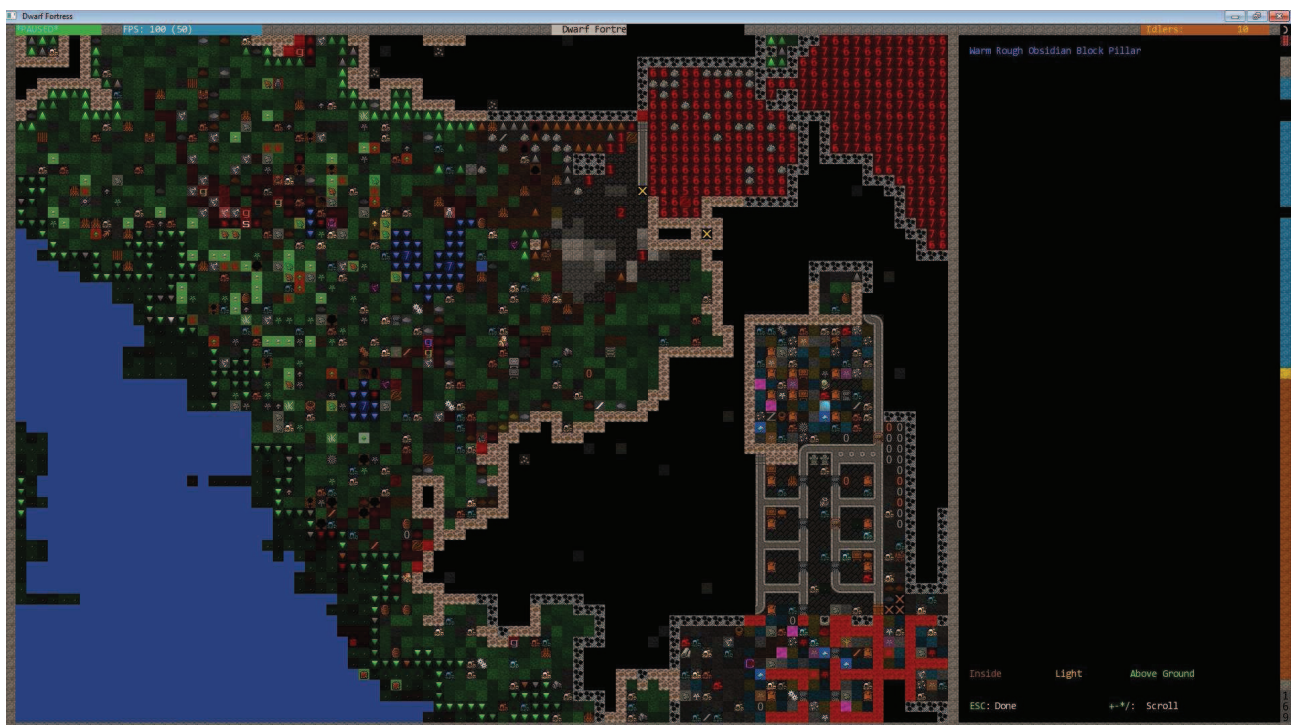

Drunk

Why do we have a corridor full of spears and a dead doe rabbits?

12th opal

I hate to inform that our last surviving named dwarf has perished. Captain something died in an unfortunate magma accident. Cause of death unknown. Forgot one corner of my magma cannon. minor leaks killed everything in the area.

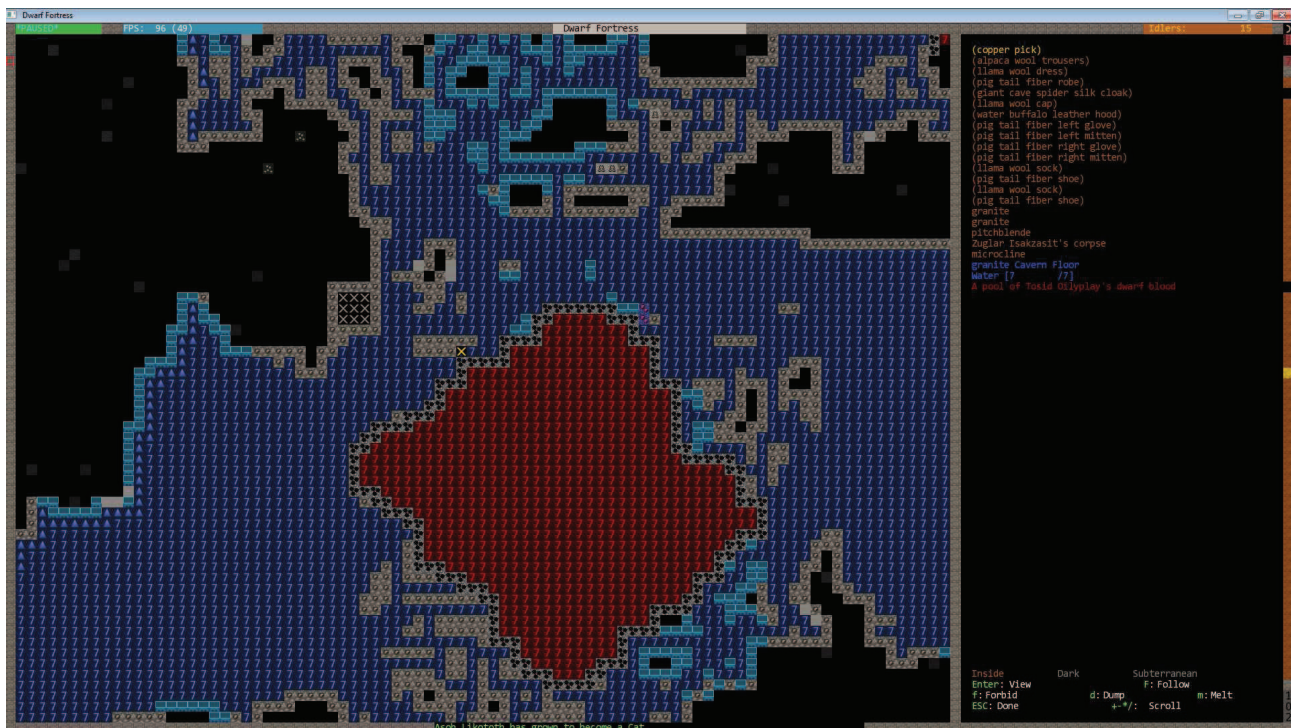

4th Obsidian

Some dwarf pulled the lever inside the have and left. Now the oor is closed and nopone is inside.
Crap.-

Oops

10th of Obsidian

I still don't know what is going on in this fort.

Another ambush. I still don't understand why any sane goblin would want to come here. There is nothing but giraffes, cave crawlers and magma in here.

20th Obsidian

Yet another ambush.

Magmacannon is ready! Not that it really matters anyway. The darn thing has been leaking magma for months and I doubt that it could push out any more than it already leaks when used.

25th Obsidian

Managed to seal the magma leak by building floors 2 floors above and dropping water. Cannon is truly ready!

Stuff happened. The end.

1st Granite

Scruffy junior is dead. Killed by a Goblin axeman. Redwarved so all hail the Scruffy junior junior. Time to hand over to the next unfortunate player. You can redwarf everyone.

I feel like I didn't manage to do anything except a few personal projects. Have fun with the followup. At least it will be easier than my start with the whole fort tantrumming. 🤔

I still don't have any idea of what actually happened during my year. All I know that I was supposed to be studying physical chemistry tonight but instead I spent the whole evening dorking around.

All I know is that all the dwarves are dwarves on the outside but inside they have hearts and souls of kobolds. That was a compliment

Year 8

Wrex's turn

This is a leather bound book. It appears to have been singed by caustic liquid. All Crafts dwarfvship is of the lowest quality.

Well, thats two drinks down. Lets make obsidian sharp again before I get too slammed. For future refrence, go into Inorganic stone layer, find obsidian, and add this:

```
[SHEAR_YIELD:33000]  
[SHEAR_FRACTURE:33000]  
[SHEAR_STRAIN_AT_YIELD:113]
```

So, what I am drinking is an ounce of Absinthe, an ounce ov Everclear 151, and a dash of blue curacao. i have drank two so far, and it tastes like ass that is on fire. you know, we could use a quotes page.

Loaded up the save. What the fucking fuck is going on her? I'm listening to some really awesome music!

No more vodka tonight, feeling sick.

SPring has arrived!!!!

Hahaha, yeeeeaaaah, somewhere around the sixth shot that embark seemed like a great idea. Less great when the zombie giant thrips showed up.

Surprisingly though it's doing pretty good. Aside from the Great Zombie Attack of the summer and the resulting insanity, nothing else much happened, and two waves of migrants stabilized the fort. So everyone is actually happy at the moment and work is being done. There's a pile of coffins in the meeting hall though, lol. Also dingo corpses scattered across the surface from when Wyrn's dorf went beserk and spent the remaining months of his life punching local wildlife. Uploading the few screenshots I took now.

Also, the staircase is hilariously off-center.

The fort is porbably dead. I'm not sure how yet, wait for the booze to wear off anf for me to wake up. I may be able to post the save at the end of this, but porbbaly not, since I'm wirring this before I even looked at it. If I am some how cogizant enough to post the save, You really should see what happened and see if the fort is somehow okay. I'll add screenshots when less blasted.

Good news! The accursed Mist cloud is harmless!
Bad news everyone is nearly dead. Or a zombie. I think Xantos's limbs got their own nicknames.

Well, see the zombie crows decended and ripped people to pieces, then the pieces animated.
And I remeber what I did in my drunken stupor to try to purge the fort of zombies: Vent the ocean.
Screenshots have been put up.
And I misspelled Xantalos as Xantos. Damnit.

Xantalos: According to my sources, I killed at least 10 dwarves with my severed limbs. Go me!

Wrex: Your intestines strangled someone, IIRC

Wrex: I think the only thing puncturing the ocean did was knock your unholy cyclone of body parts into the caverns.

If you are willing to let it run overnight so that the ocean drains out into the caverns, reclaim may be possible. *Maybe.*
